× A reluctantly

× B scrupulously

× C ponderously

× D strenuously

While all the benefits of sleep have yet to be discovered, research has shown that the brain works to _____ memories during a sleep cycle. A study led by Jeffrey M. Ellenbogen demonstrates that individuals who slept after learning were significantly more likely to recall the information with greater accuracy compared to those who remained awake. The findings of the study suggest that sleep plays a crucial role in improving the ability to recall information through processing and combining newly acquired knowledge.

5. Which choice completes the text with the most logical and precise word or phrase?

× A sedentary

× B sprightly

× C devoted

× D ailing

The following text is from Christopher Columbus's 1492 voyage log, which was written as an official report to King Ferdinand and Queen Isabella of Spain.

O most Christian, and very high, very excellent, and puissant Princes, King and Queen of the Spains and of the islands of the Sea, our Lords, in this present year of 1492, after your Highnesses had given an end to the war with the Moors who reigned in Europe, and had finished it in the very great city of Granada, where in this present year, on the second day of the month of January, by force of arms, I saw the royal banners of your Highnesses placed on the towers of Alfambra, which is the fortress of that city, and I saw the Moorish King come forth from the gates of the city and kiss the royal hands of your Highnesses, and of the Prince my Lord.

PREV. QUESTION NEXT QUESTION

6. Which choice best states the main purpose of the text?

× A To solicit funds from the crown for future exploration

× B To celebrate the end of the war with Granada

× C To describe how the Spanish defeated the Moors

× D To flatter the reigning monarchs of Spain

Pastor Martin Niemöller became one of the fiercest critics of bigotry and racism in the 20th century, even though he began his career as an ardent nationalist who supported the ideology of the Nazis. However, when Adolf Hitler ordered changes to church doctrine, Niemöller, a Lutheran clergyman, protested and was sent to a concentration camp where he lived among people from many faith traditions. This experience changed his worldview, and by the end of World War II, he began promoting interdenominational collaboration to prevent violence and promote acceptance.

PREV. QUESTION NEXT QUESTION

7. According to the text, why was Martin Niemöller imprisoned?

- ✖ A He disagreed with Nazi political ideology and supported peaceful cultural coexistence.
- ✖ B He was a Lutheran minister, and the government discriminated against Lutherans.
- ✖ C He supported a political party that advocated for separation between church and state.
- ✖ D He vocally opposed government interference in church organization and teaching.

The following text comes from the 11th-century work *The Chronicle of Ahimaaz* written by Ahimaaz ben Paltiel.

> In those days there was in Bari, Saudan, the chieftain of the Arabians at the time, who held sway over the entire country. He sent messengers to the famous city of Oria, to make a treaty of peace with its inhabitants, promising not to deliver their land to destruction, only to exact tribute of them. But this was just a ruse, by which he planned to fall upon the city suddenly and overthrow it, and lay it waste.

PREV. QUESTION NEXT QUESTION

8. According to the text, what did Saudan want to do with the city of Oria?

- ✖ A He wanted to make peace with the city.
- ✖ B He wanted to force the city to pay him regular tribute.
- ✖ C He wanted to threaten the city so it would surrender.
- ✖ D He wanted to lay a trap for a surprise attack on the city.

In explaining the evolution of fungi from aquatic to land-bound organisms, biologists from the Barcelona Institute of Science and Technology have put forward a “green” hypothesis (that fungi evolved from a dependence on land-bound plants) and a “brown” hypothesis (that fungi evolved alongside soil microbes). In addition, institute researchers Miguel A. Naranjo-Ortiz and Toni Gabaldón have included a “white” hypothesis, which posits that fungi evolved from water to land as a reaction to icy climate.

PREV. QUESTION | NEXT QUESTION

9. According to the text, how is the white hypothesis different from the other two hypotheses?

× A It indicates that fungi eventually evolved alongside land-bound organisms.

× B It emphasizes how lower temperatures hindered the mobility of fungi.

× C It posits a parallel involving early fungi and the microbes found in icy water.

× D It suggests that fungi evolved in response to an environmental condition.

In a recent study, political scientists Christopher Faricy and Christopher Ellis surveyed voters about three well-known programs: the mortgage interest deduction, the retirement savings tax deduction, and the Supplemental Nutrition Assistance Program, or SNAP (commonly known as food stamps). Researchers varied descriptions of the three, characterizing them in some surveys as tax incentives while in others as a form of direct spending. They hypothesized that support for social programs would be higher when they were presented as tax breaks rather than direct spending.

PREV. QUESTION NEXT QUESTION

10. Which finding from the researchers' study, if true, would most strongly support their hypothesis?

✖ A Voters were less supportive of the mortgage interest deduction when it was described as direct spending rather than a tax break.

✖ B Republicans were more supportive of programs administered through tax measures than through direct subsidies.

✖ C Democrat support for social programs decreased dramatically if those programs were described as benefiting the wealthy.

✖ D Support for SNAP stayed relatively consistent whether presented as a direct spending program or as a tax break.

Relative Abundance of Bacteria on Common Kitchen Surfaces

	Sponge	Cloth	Sink	Cutting Board	Counter top
Staphylococcus	5%	8%	9%	9%	10%
Yersiniaceae	3%	4%	7%	10%	18%
Acinetobacter	60%	58%	54%	50%	51%
Pseudomonas	20%	16%	10%	14%	16%
Enhydrobacter	10%	12%	9%	9%	2%
Psychrobacter	2%	2%	4%	8%	3%

To identify the microbes in his apartment kitchen, a student in a microbiology class took samples from a sponge, cloth, sink, cutting board, and countertop. After analyzing these samples in a lab, he found six major bacterial strands: *Staphylococcus, Yersiniaceae, Acinetobacter, Pseudomonas, Enhydrobacter*, and *Psychrobacter*. The student concluded that of all the kitchen surfaces, the countertop contained the highest percentage of four of the six different bacteria strains.

PREV. QUESTION NEXT QUESTION

11. Which choice best describes data from the table that weaken the student's conclusion?

A. Among the kitchen items, the countertop was found to have the lowest percentages of *Staphylococcus, Yersiniaceae*, and *Enhydrobacter*.

B. *Psychrobacter, Enhydrobacter*, and *Acinetobacter* were found in the lowest percentages on the countertop.

C. The countertop had lower percentages of *Pseudomonas, Psychrobacter*, and *Yersiniaceae* compared to the other surfaces.

D. The countertop had lower percentages of *Pseudomonas, Enhydrobacter*, and *Acinetobacter* than other surfaces.

In 1901, Greek divers discovered an artifact that would soon be known as the "Antikythera mechanism," an ancient device believed to date back as far back as 200 BCE. Using X-ray imaging, Tony Freeth and his team revealed its purpose: to calculate astronomical events. Before this discovery, it was thought ancient Greeks solely relied on observation and record-keeping for celestial tracking. However, the Antikythera mechanism is quite complex, featuring thirty intricate gears with a design that should not have existed during that period. On the back of the device, one dial functions to predict hundreds of future moon phases while another dial predicts the dates of solar and lunar eclipses. Therefore, the discovery of the Antikythera mechanism suggests that _____

PREV. QUESTION NEXT QUESTION

12. Which choice most logically completes the text?

× A it possesses extraordinary predictive capabilities for modern-day celestial events.

× B historians may have underestimated the technological skill of ancient Greeks.

× C historians were likely wrong with their estimation of when the device was invented.

× D ancient Greeks could not predict celestial events until the 1st-century CE.

A growth mindset is the assumption that one's intelligence and abilities can improve; it is often contrasted with a fixed mindset, which assumes that one's intellect and faculties are inherent from birth and cannot develop. Since psychologist Carol Dweck introduced the growth mindset concept in 2006, American educators have embraced the idea wholeheartedly. However, most studies have found that while it boosts student self-esteem, a growth mindset has only a small positive impact on academic performance, suggesting that _____

PREV. QUESTION NEXT QUESTION

13. Which choice most logically completes the text?

✖ A the growth mindset has not been around long enough to make any measurable difference academically.

✖ B the growth mindset's quantifiable benefits to student confidence outweigh any academic disadvantages.

✖ C the growth mindset is a flawed idea that should be rejected by educators because it hinders students' education.

✖ D the growth mindset may not produce desired outcomes without additional factors like continual practice and hard work.

Aerogel is a low-density substance and is considered to be one of the lightest solid materials in the world. Due to its exceptional insulating properties, aerogels are often used in space crafts, such as Mars rovers. Though first developed in the 1930s, continuous research has led to significant aerogel _____ instance, in 2011, the Glenn Research Center discovered that reinforcing aerogel with polymers significantly enhances its durability.

- C Specifically,
- D Likewise,

notes:

- According to the United States Geological Survey (USGS), amphibian populations are in a state of worldwide decline.
- Statistics from the USGS indicate that amphibian populations in the United States decrease by 3.79 percent every year.
- Pesticide use may be responsible for some of the US decline.
- Climate change may also be responsible for both US and worldwide declines.

24. The student wants to connect the decline in US amphibian populations to a possible cause. Which choice most effectively uses relevant information from the notes to accomplish this goal?

✖ A The USGS has revealed that the decline in the US amphibian population is primarily driven by the overuse of pesticides.

✖ B Declines in amphibian populations in the US could be due to climate change.

✖ C Factors such as climate change have been linked to amphibian population declines in different parts of the world.

✖ D US amphibian populations have been declining by 3.79 percent annually, according to the USGS.

- In Franz Kafka's 1913 short story "The Judgment," a young clerk named Georg Bendemann and his elderly father have a heated argument.
- Some literary critics claim that the argument is mostly nonsensical.
- The story was published in Kafka's lifetime.
- In Kafka's unfinished novel *The Trial*, a bank clerk named Josef K. is arrested and prosecuted.
- The reasons for Josef K.'s arrest and trial are never specified.
- The novel was published after Kafka's death by Kafka's friend and executor Max Brod.

25. The student wants to explain a specific similarity between two texts. Which choice most effectively uses relevant information from the notes to accomplish this goal?

A. Kafka's short story "The Judgment" places a young man in irrational circumstances, which parallels the situation in his unfinished novel *The Trial*.

B. The short story "The Judgment" appeared during Kafka's lifetime, unlike *The Trial*, which was published posthumously.

C. *The Trial* depicts a mysterious legal case, while Kafka's earlier short story "The Judgment" depicts a domestic dispute.

D. Kafka's writings "The Judgment" and *The Trial* focus, respectively, on the conflicts within a family and secretive dealings of a legal system.

While researching a topic, a student has taken the following notes:

- Director Ridley Scott's 1982 film *Blade Runner* is considered a classic of science fiction cinema.
- It is a somewhat loose adaptation of *Do Androids Dream of Electric Sheep?*, a 1968 novel by Philip K. Dick.
- Scott's film was not commercially successful when it was released but later gained a devoted audience.
- A "Director's Cut" appeared on video in 1992, replacing the 1982 film's happy ending with a darker conclusion to better align with the tone of the narrative.
- A "Final Cut" appeared in 2007, introducing further technical edits.

PREV. QUESTION NEXT QUESTION

26. The student wants to explain how the "Director's Cut" differs from the 1982 *Blade Runner* to an audience unfamiliar with the film. Which choice most effectively uses relevant information from the notes to accomplish this goal?

× A *Blade Runner*, a classic science fiction film directed by Ridley Scott, was loosely based on Philip K. Dick's 1968 novel *Do Androids Dream of Electric Sheep?*

× B A new version of Ridley Scott's science fiction classic *Blade Runner*, known as the "Director's Cut," emerged in 1992, revising the ending to better align with the film's darker tone.

× C Although the 1992 "Director's Cut" version of *Blade Runner* is different from the "Final Cut" version, both make alterations to the original film from 1982.

× D Despite *Blade Runner*'s lack of commercial success during its 1982 theatrical run, the "Director's Cut" was released in 1992 and "The Final Cut" in 2007, thanks to the devoted fans who discovered the film later on.

While researching a topic, a student has taken the following notes:

- The En-Gedi scroll is an ancient Jewish scroll discovered in 1970.
- The scroll was damaged in a fire and had become charcoal at the time of discovery.
- Virtual unwrapping is a novel noninvasive computer imaging technique that helps researchers read fragile ancient documents.
- A team led by William Seales applied virtual unwrapping to the En-Gedi scroll.
- The scientists made a digital 3D copy of the document before using software to identify bright pixels, which indicate ink marks.
- The team's analysis revealed the scroll to be a copy of an ancient Jewish text called Leviticus.

PREV. QUESTION

27. The student wants to present the research of William Seales's team to an audience unfamiliar with the En-Gedi scroll. Which choice most effectively uses relevant information from the notes to accomplish this goal?

✖ A Researchers made a virtual copy of the En-Gedi scroll using computer imaging software; this process, called virtual unwrapping, helped scientists analyze the scroll's contents.

✖ B Virtual unwrapping is a revolutionary computer imaging technique used by researchers to decipher the contents of ancient scrolls that are otherwise unreadable.

✖ C Using a new computer imaging technique, researchers revealed that the En-Gedi scroll, a previously unreadable ancient document, was a copy of the Jewish text Leviticus.

✖ D The En-Gedi scroll is an ancient document that was discovered in 1970; because the document was burnt in a fire, attempts to open the scroll would have permanently damaged it.

MODULE 2B

Professionals in high-stress environments often use mental enhancers like methylphenidate and dextroamphetamine to improve performance. However, a new study led by Elizabeth Bowman suggests these drugs are _____ because even though they can increase motivation, they can also decrease overall productivity.

× B indecipherable to

× C eliminated by

× D revered by

The following text comes from Polybius' second-century work *Histories*.

> In my former book I explained the causes of the second war between Rome and Carthage; and described Hannibal's invasion of Italy, and the engagements which took place between them up to the battle of Cannae, on the banks of the Aufidus. I shall now take up the history of Greece during the same period, ending at the same date, and commencing from the 140th Olympiad.

PREV. QUESTION | NEXT QUESTION

5. Which choice best states the main purpose of the text?

× A To explain the war between Rome and Carthage

× B To describe the nuances of Greek culture

× C To detail the events of the 140th Olympiad

× D To introduce the subject of the work

The following text comes from the 17th-century work *History of Al Maggari* written by Ahmed Al Maggari. In this text, a general addresses his soldiers.

> Remember that I place myself in the front of this glorious charge which I exhort you to make. At the moment when the two armies meet hand to hand, you will see me, never doubt it, seeking out this Roderick, tyrant of his people, challenging him to combat, if God is willing. If I perish after this, I will have had at least the satisfaction of delivering you, and you will easily find among you an experienced hero, to whom you can confidently give the task of directing you. But should I fall before I reach to Roderick, redouble your ardor, force yourselves to the attack and achieve the conquest of this country.

PREV. QUESTION | NEXT QUESTION

6. Which choice best describes the function of the underlined portion in the text as a whole?

× A It emphasizes the importance of the army being led by a capable and honorable hero.

× B It assures the soldiers that they are equipped to continue their battle, even if the general falls.

× C It suggests that it isn't likely that the general will survive the battle, so the soldiers must decide on another leader in advance.

× D It outlines the battle tactics the army should rely upon to overcome the opposition.

The following text is from Josephus's first-century work *The Wars of the Jews*, which covers the history of the Roman-Jewish wars.

> While some men who were not concerned in the affairs themselves have gotten together vain and contradictory stories by hearsay, and have written them down after a sophistical manner; and while those that were there present have given false accounts of things; and while their writings contain sometimes accusations, and sometimes encomiums, but no where the accurate truth of the facts; I have proposed to myself, for the sake of such as live under the government of the Romans, to translate those books into the Greek tongue, which I formerly composed in the language of our country, and sent to the Upper Barbarians; Joseph, the son of Matthias, by birth a Hebrew, a priest also, and one who at first fought against the Romans myself, and was forced to be present at what was done afterwards.

PREV. QUESTION NEXT QUESTION

7. Which choice best describes the overall structure of the text?

✖ A It describes anti-Roman propaganda, then describes the war that resulted from it.

✖ B It attacks the objectivity of other treatises, then elaborates on the author's experiences.

✖ C It criticizes historical works by other authors, then gives evidence of its own credibility.

✖ D It points out contradictions in ancient books, then corrects those discrepancies.

The following text comes from Theodore Roosevelt's 1910 speech "Citizenship in a Republic."

> It is not the critic who counts; not the man who points out how the strong man stumbles, or where the doer of deeds could have done them better. The credit belongs to the man who is actually in the arena, whose face is marred by dust and sweat and blood; who strives valiantly; who errs, who comes short again and again, because there is no effort without error and shortcoming; but who does actually strive to do the deeds; who knows the great enthusiasms, the great devotions; who spends himself in a worthy cause; who at the best knows in the end the triumph of high achievement, and who at the worst, if he fails, at least fails while daring greatly, so that his place shall never be with those cold and timid souls who neither know victory nor defeat.

PREV. QUESTION | NEXT QUESTION

8. Which choice best states the main purpose of the text?

× A To call for men to achieve victory in the arena of life

× B To encourage critics to focus on themselves instead of others

× C To detail the characteristics of a praiseworthy person

× D To list the improvements necessary to better one's life

Text 1

Tulip Mania was an infamous economic phenomenon that took place in Holland in the 1630s. As the colorful flowers' popularity and value as status symbols grew, so did their price. Eventually, the most expensive tulips were selling for the price of mansions even before they were planted. By 1637, prices finally peaked, and this financial bubble experienced a legendary downturn. The government had to intervene and restore financial stability to those who had become bankrupt, but many investors were left financially ruined.

Text 2

Financial bubbles are an economic event where the price of an item skyrockets past its real value and then collapses when investors begin to realize that they will not be able to sell the product. In short, the existence of a financial bubble hinges on the participation of investors who fuel the frenzy. One notable example is the Tulip Mania bubble, in which investors had bet on the future demand for tulips, often trading contracts for bulbs that didn't yet exist. All investors should beware any investment opportunity that seems too good to be true;

PREV. QUESTION | NEXT QUESTION

9. Based on the texts, what would the author of Text 2 likely say about Text 1's discussion of Tulip Mania?

× A It describes Tulip Mania as a financial bubble but provides details that contradict this description.

× B It fails to acknowledge the role individual investors play in financial bubbles like Tulip Mania.

× C It exaggerates the extent of the damage that Tulip Mania caused among investors.

× D It misrepresents the reason why tulips became popular among investors in the 1630s.

The following text is from Samuel Taylor Coleridge's 1816 poem "Kubla Khan."

In Xanadu did Kubla Khan
A stately pleasure-dome decree:
Where Alph, the sacred river, ran
Through caverns measureless to man
Down to a sunless sea.
So twice five miles of fertile ground
With walls and towers were girdled round;
And there were gardens bright with sinuous rills,
Where blossomed many an incense-bearing tree;
And here were forests ancient as the hills,
Enfolding sunny spots of greenery.

PREV. QUESTION NEXT QUESTION

10. According to the text, what did Kubla Khan want to build?

× A A palatial estate for recreation

× B A large farm for the production of incense

× C A religious shrine to mark a sacrosanct river

× D A walled garden outside of his city

"A Thread Without a Knot" is a 1920 short story by Dorothy Canfield Fisher. The protagonist Harrison, much to the dismay of his professor, adopts a casual, apathetic approach to education: _____

PREV. QUESTION NEXT QUESTION

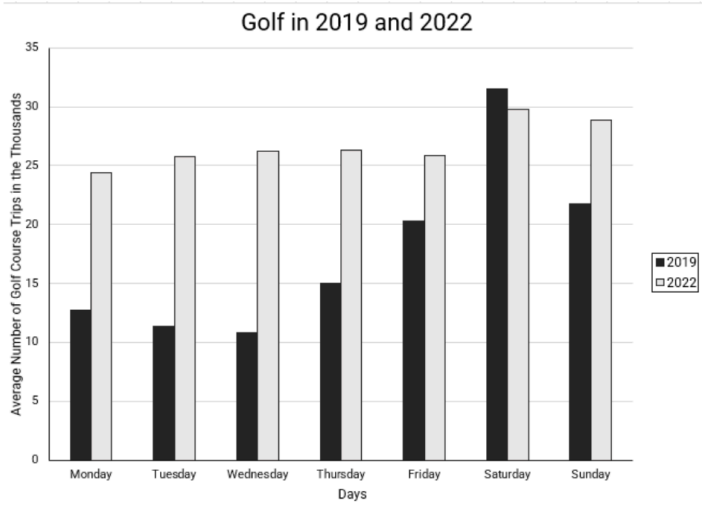

11. Which quotation from "A Thread Without a Knot" most effectively illustrates the claim?

× A "It's borne in on me that you can't climb up very fast in modern American universities unless you've got a doctor's degree."

× B "You know as well as I do that right here in Illinois I can find out everything that's worth knowing about the early French explorers of the Mississippi."

× C "Three months in the Archives in Paris ought to put a polish on my dissertation that will make even Columbia and Harvard sit up and blink."

✖ D "You didn't think I had it in me to take this Ph.D. so seriously, did you, Prof? And you're dead right, too! I'm doing it because I've got to, that's all."

The expansion of remote work during the 2020 COVID-19 pandemic has affected not just the office but also the golf course. With flexible schedules and significant time saved on commutes, Americans no longer needed to wait for the weekend to experience leisure; they could pursue hobbies, even time-consuming ones like golf, in the middle of the week: for example, _____

PREV. QUESTION NEXT QUESTION

12. Which choice most effectively uses data from the graph to complete the text?

✖ A the number of golf trips on Mondays drastically increased from around 13,000 to nearly 25,000 by 2022.

✖ B compared to 2019, the number of Friday golf course trips increased by over 5,000 in 2022.

✖ C the number of golf trips on Saturdays decreased in 2022 because more people went on Mondays and Tuesdays.

✖ D the number of golf trips on Wednesdays went from around 11,000 in 2019 to 26,000 in 2022.

Researchers from the University of Johannesburg conducted a study on the rare Andean Goose, focusing on its habitat located at elevations between 3000 and 6000 meters, where the air is thin. The team hypothesized that such high-altitude living conditions would lead to specific pulmonary, or respiratory, adaptations in these birds. In general, birds exhibit several unique characteristics that set them apart from other animals. These distinguishing features include lightweight bone structures, specialized lung structures with unidirectional airflow and infundibular tubules, and wing shapes that affect their glide ratio—the distance a bird travels horizontally for each foot it descends in altitude.

PREV. QUESTION NEXT QUESTION

13. Which finding, if true, would most directly support the researchers' hypothesis?

✖ A The Andean goose exhibits more efficient glide ratios than other birds.

✖ B The Andean goose exhibits exceptionally high oxygen diffusion capacity.

✖ C The Andean goose exhibits lighter than normal bone structures.

✖ D The Andean goose exhibits greater muscle density.

Weight of Maize Plants in Grams After Seeding

Type of Fertilizer	10 days	28 days	46 days	64 days
No Fertilizer	19.42	32.75	52.17	84.92
Organic Fertilizer	21.66	40.00	61.66	101.66
Chemical Fertilizer	26.52	40.27	66.79	107.06
Nitrogen-fixers	24.74	42.33	67.07	109.40
Phosphate-solubilizers	23.18	44.57	67.75	112.32
Cellulolytic	22.65	44.13	66.78	110.91

A student in a botany class conducted an experiment to demonstrate the effect of bacteria-based fertilizers on plant mass. She planted six maize plants and ensured each received equal water and sunlight. She then treated the soil of three of the plants with three different fertilizers containing the following bacterial additives: nitrogen-fixing bacteria, phosphate-solubilizing bacteria, and cellulolytic bacteria. The other plants received bacteria-free organic fertilizers, chemical fertilizers, or no additives at all. The student weighed each plant regularly after planting them, and on the sixty-fourth day, found that bacteria-based fertilizers, while producing the heaviest plants, did not outperform other types of fertilizers to the extent that was predicted. For example, _____

PREV. QUESTION NEXT QUESTION

14. Which choice most effectively uses data from the table to complete the example?

× A the weight of the plant treated with a chemical fertilizer was only slightly lower than the plant treated with nitrogen-fixers.

× B the weight of the plant treated with phosphate-solubilizers was the highest of all the plants.

× C the weight of the plant that was not treated with any additives was the lowest of the group.

× D the weight of the plant treated with nitrogen-fixers was only slightly higher than the plant treated with cellulolytic bacteria.

Scholars have long debated the Rosetta Stone's purpose and why it contains three distinct scripts. Some experts propose the Stone was a commemorative decree, meant to honor King Ptolemy V's coronation. This theory suggests the Stone features three different scripts to ensure Egypt's diverse population understood the message. However, researcher Foy Scalf believes its purpose goes beyond that. During Ptolemy V's ascension, Egypt grappled with political turmoil: the king was a young child, and the Seleucid Empire in western Asia began invading territories under Egypt's control. Therefore, the Rosetta Stone was inscribed in three different scripts _____

15. Which choice most logically completes the text?

✖ A to make a formal declaration of war to the Seleucid Empire and other potential threats.

✖ B to assert the legitimacy and authority of the new king not only to the people of Egypt but also to opposing powers.

✖ C to accommodate the linguistic diversity of Egypt's population as well as regions under Egypt's rule.

✖ D to establish a new form of communication between Egypt and the Seleucid Empire.

In the 19th century, music improvisation contests were popular in Vienna: two musicians would take turns playing until one could not outperform the other. Musician Daniel Steibelt had once challenged Ludwig van Beethoven to this contest. Steibelt first impressed the audience with a stellar performance, but Beethoven then took some music written by Steibelt and created an entire composition based on the first four notes of Steibelt's piece, imitating, varying, and embellishing Steibelt's style. Before Beethoven finished playing, Steibelt walked out of the room and left the city, never returning until after Beethoven's death, suggesting that _____.

16. Which choice most logically completes the text?

× A Steibelt was angry that Beethoven cheated in the contest by using Steibelt's own sheet music.

× B Steibelt realized he lost the contest so badly that his reputation was irreparably damaged.

× C Steibelt knew he was a better musician than Beethoven and needed another chance to prove it.

× D Steibelt viewed the contest as proof that he was the better composer even though Beethoven was the better performer.

In his collection "The Lonely Cosmonaut," visionary photographer David Schermann combines cosmic exploration and _____ mankind's venture into new territories through conceptual photography.

In the late 1880s, typesetting—laying out individual letters for printing—became a competitive sport. Annual competitions were held in Boston, for men and women separately, to determine the fastest typesetter or "swift." Such tournaments provided a platform for women to demonstrate their exceptional skills and capabilities. The _____ placed first, second, and third in the 1887 tournament, for example, outscored all of the male competitors. The success of these women opened the door for female admission into Boston's Typographical Union a few months later.

26. Which choice completes the text with the most logical transition?

× A Ultimately,

× B Moreover,

× C However,

× D Similarly,

While researching a topic, a student has taken the following notes:

- Authoritarian regimes are characterized by prohibitions against criticizing and resisting the government.
- Totalitarian regimes mandate citizens go beyond simple compliance and enthusiastically praise the government.
- During the tenure of President Vladimir Putin, Russia has seen a decline in the number of political parties that oppose the government.
- In the 2020s, Vladimir Putin banned any news media that was critical of his invasion of Ukraine from broadcasting.
- In 2021, a new patriotic curriculum was introduced in elementary schools to glorify the Russian state.

PREV. QUESTION NEXT QUESTION

27. The student wants to make and support a generalization about why Russia's government is more totalitarian than authoritarian. Which choice most effectively uses relevant information from the notes to accomplish these goals?

× A Under Vladimir Putin, political parties and news media critical of the government have been banned—evidence of an aversion to criticism characteristic of totalitarian states.

× B In addition to censorship, Vladimir Putin has changed education in Russia by mandating a curriculum that praises the government, displaying totalitarian tendencies.

✖ C Russian President Vladimir Putin has called for restrictions on individuals or groups critical of his government, a move often associated with totalitarian dictators.

✖ D As expected from totalitarian states, the President of Russia, Vladimir Putin, has attempted to stamp out resistance to his invasion of Ukraine by restricting political and journalistic freedom.
