INNOVATOR TEST 4

READING AND WRITING MODULE 1

Recent developments in artificial intelligence, otherwise known as AI, are helping to _____ changes in educational technology. For example, the popular online educational resource Khan Academy recently debuted a small-scale pilot program that incorporates Chat GPT–4 with their online interface to create a more customized and interactive experience for learners.

NEXT QUESTION

1. Which choice completes the text with the most logical and precise word or phrase?

× A maneuver

× B transport

× C unveil

× D stimulate

In 2014, the Lyndon B. Johnson Presidential Library hosted a three-day civil rights summit to _____ the 50th anniversary of the signing of the Civil Rights Act of 1968. Additionally, the event celebrated the historical significance of the Voting Rights Act of 1965 and the Fair Housing Act of 1968, both of which were important legal steps toward ensuring equality for all Americans.

- A vindicated
- B exacerbated
- C castigated
- D mitigated

COME BACK LATER

The following is from the opening of Sarah E. Farro's 1891 novel, *True Love: A Story of English Domestic Life*.

A fine old door of oak, a heavy door standing deep within a portico inside of which you might have driven a coach, brings you to the residence of Mrs. Brewster. The hall was dark and small, the only light admitted to it being from windows of stained glass; numberless passages branched off from the hall, one peculiarity being that you could scarcely enter a single room in it but you must first go down a passage, short or long, to get to it; had the house been designed by an architect with a head upon his shoulders and a little common sense within it, he might have made a respectable house to say the least; as it was, the rooms were cramped and narrow, cornered and confined, and the good space was taken up by these worthless passages.

PREV. QUESTION NEXT QUESTION

5. Which choice best describes the overall structure of the text?

× A It introduces Mrs. Brewster and how the house symbolizes her chaotic personality.

× B It details the home's assets and then contrasts this with a description of why Mrs. Brewster disapproves of the home.

× C It describes the layout of the home, starting with the entrance of the house, moving on to the hallways, and then finally to the rooms.

× D It provides the history of the home and then explains how some of its unusual features serve a practical purpose.

The following is adapted from the first chapter of Ann Radcliffe's 1794 gothic novel *The Mysteries of Udolpho*.

> On the pleasant banks of the Garonne, in the province of Gascony, stood, in the year 1584, the château of Monsieur St. Aubert. From its windows were seen the pastoral landscapes of Guienne and Gascony stretching along the river, gay with luxuriant woods and vine, and plantations of olives. To the south, the view was bounded by the majestic Pyrenees, whose summits, veiled in clouds, or exhibiting awful forms, seen, and lost again, as the partial vapors rolled along, were sometimes barren, and gleamed through the blue tinge of air, and sometimes frowned with forests of gloomy pine, that swept downward to their base. These tremendous precipices were contrasted by the soft green of the pastures and woods that hung upon their skirts; among whose flocks, and herds, and simple cottages, the eye, after having scaled the cliffs above, delighted to repose.

PREV. QUESTION | NEXT QUESTION

6. Which choice best states the main purpose of the text?

- ✖ A) To introduce and describe the house of Monsieur St. Aubert
- ✖ B) To persuade the reader about the beauty of the landscape
- ✖ C) To contrast the inner world of the main character with his surroundings
- ✖ D) To describe the disparate elements in the setting

COME BACK LATER

Text 1

In his 1909 biography of George Bernard Shaw, literary critic G.K. Chesterton evaluates Shaw's long-winded play introductions. Though some consider these prefaces flawed, claiming they berate the audience on what it should think of events as they unfold, Chesterton calls them necessary to convey the didactic character of Shaw's plays. For Shaw, says Chesterton, the interpretation and analysis of facts hold greater importance than the facts themselves.

Text 2

In the introduction to his 1912 play *Pygmalion*, Shaw boasts of the play's success in Europe, North America, and his home country Ireland. He speculates this success comes from the play's instructive nature, which challenges the critical notion that art should only be art as opposed to a pointed message or moral teaching—for in *Pygmalion*, Shaw conveys several important lessons, such as the power of language and appearances in society.

PREV. QUESTION NEXT QUESTION

7. Based on the texts, how would Chesterton most likely respond to the claim that art "should only be art as opposed to a pointed message," as mentioned in Text 2?

× A He would agree because he considered Shaw's long-winded prefaces distracting and artistically limiting.

× B He would disagree because he suggested Shaw's lengthy prefaces contribute to the impact of his plays.

× C He would disagree because he considered Shaw's plays fundamentally flawed without further context.

× D He would agree because he demonstrated Shaw's prefaces insulted the intelligence of audiences by telling them what to think.

The following text is from the opening letter of Mary Shelley's 1818 novel *Frankenstein*, in which Robert Walton addresses his sister regarding his ocean voyage north.

> You will rejoice to hear that no disaster has accompanied the commencement of an enterprise which you have regarded with such evil forebodings. I arrived here yesterday; and my first task is to assure my dear sister of my welfare, and increasing confidence in the success of my undertaking.

PREV. QUESTION | NEXT QUESTION

8. Which choice best states the main idea of the text?

✖ A Robert indicates that the trip has been safe thus far, despite his sister's fears.

✖ B Robert is trying to reassert his confidence despite his anxiety.

✖ C Robert worries that the journey's beginnings predict disaster.

✖ D Robert believes that the enterprise, if successful, will improve his sister's welfare.

The following text is adapted from the opening letter of Samuel Richardson's 1740 epistolary novel, *Pamela; or, Virtue Rewarded*. Pamela, who serves as a maid, writes to her parents back home.

Dear Father and Mother,

I have great trouble to acquaint you with. The trouble is that my good lady died of the illness I mentioned to you, and left us all much grieved for the loss of her; for she was a dear good lady, and kind to all us her servants. Much I feared, that as I was taken by her ladyship to wait upon her person, I should be quite destitute again, and forced to return to you, who have enough to do to maintain yourselves.

PREV. QUESTION NEXT QUESTION

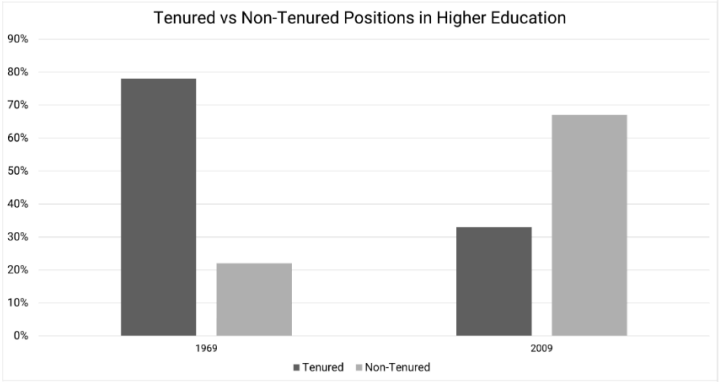

9. According to the text, what is the "great trouble" that Pamela mentions in her letter?

✖ A Pamela is stricken with grief over the death of her employer, who was a good friend.

✖ B Pamela must return home due to a change in circumstances, which she knows will be a inconvenience for her parents.

✖ C After the passing away of her employer, Pamela has great doubts about her future direction.

✖ D Despite being content with the prospect of returning home, Pamela is conflicted regarding her loyalty towards her former employer.

The shift in the faculty at most institutions over the past half century has been notable. According to the Association of Governing Boards of Universities and Colleges, in 1969, full-time, tenure-track faculty made up nearly 80 percent of the instructors in all institutions of higher learning, but _____

PREV. QUESTION NEXT QUESTION

10. Which choice most effectively uses data from the graphs to complete the statement?

✖ A tenure-track faculty still made up two-thirds of all instructors in 2009.

✖ B the proportion of tenure-track faculty marginally decreased forty years later.

✖ C in 2009, there were slightly more instructors eligible for tenure than there were tenured faculty in the late 1960s.

✖ D tenure-track positions accounted for only one-third of all instructors by 2009.

NASA's *Juno* spacecraft has been orbiting Jupiter since 2016, collecting data on the planet's atmosphere, magnetic field, and other features. Based on the data gathered by *Juno*, planetary scientists claim that Jupiter's powerful magnetic field may be responsible for generating the planet's vibrant auroras. On Earth, auroras are created when charged particles from solar wind collide with gases within the Earth's magnetic field. However, Jupiter's magnetosphere deflects solar wind away from its atmosphere, leading scientists to believe that Jupiter's auroras must come from another source.

PREV. QUESTION NEXT QUESTION

11. Which finding, if true, would most directly support the scientists' claim?

× A Jupiter's magnetic field traps charged particles that are ionized by the Sun's strong light in its upper atmosphere, guiding the particles towards the poles and triggering the colorful auroras.

× B The temperature of Jupiter's upper atmosphere is responsible for creating the charged particles that generate the planet's colorful auroras.

× C Solar wind produces charged particles that combine with gases in Jupiter's upper atmosphere to produce the planet's auroras.

× D Jupiter's magnetic field is highly dynamic, with significant variations in strength and orientation occurring over time; these variations are believed to be influenced by the planet's internal processes and atmospheric conditions.

Some argue that differences between laws regarding automobile safety in different regions reveal the arbitrary nature of these regulations; for example, some states require all passengers in a car to wear seat belts, while others make allowances for differences in age or where a person sits in the vehicle. However, some of these differences can be explained by differences in the regions themselves: a speed limit of 80 miles per hour may be sensible on the interstate in rural South Dakota, but such speeds would clearly be unsafe at the junction of several major highways in Chicago. Therefore, those who argue that all automobile safety laws are arbitrary _____

PREV. QUESTION NEXT QUESTION

12. Which choice most logically completes the text?

× A are correct because not all laws can be explained rationally based on regional differences.

× B are correct because some laws differ from region to region.

× C are incorrect because some laws can be explained rationally based on regional differences.

× D are incorrect because all laws are based on the same rational principles.

The use of the chronicle in history writing was seen as unsophisticated as early as the 16th century. Humanist historians judged the seemingly arbitrary collection of personal accounts, anecdotal references and records in these chronicles as childishly inferior to the purposefully ordered and rhetorically powerful narratives of the "great writers" of the ancient Greeks and Romans, and so the chroniclers fell from popularity and the mode was largely abandoned. More recently, however, the form has enjoyed a new vogue for some of the very reasons it was formerly rejected: rather than being seen as disorderly, chronicles are now being appreciated for _____

PREV. QUESTION NEXT QUESTION

13. Which choice most logically completes the text?

× A providing a highly ordered and purposeful view of history, just like that of the best of the ancients.

× B having little value for producing an understanding of history or an appreciation of great writing.

× C generating an alternate history superior to those of the humanist historians who rejected them.

× D offering more perspectives and voices in their collections of material from different sources.

Historically, the purpose of establishing a designated "preservation" area has been to safeguard it from the incursion of human-related disturbances. However, the efforts to maintain the natural state, ironically, have failed in completely preventing the impacts of human development on the protected region. Preservation efforts have also hindered the occurrence of necessary natural changes required to sustain the area's "natural" condition. Thus, the notion of preservation in such regions has changed, and the need for certain deliberate human interventions has become increasingly commonplace. For example, _____

PREV. QUESTION NEXT QUESTION

14. Which choice most logically completes the text?

× A former preserved regions are now being developed for industrial and residential use due to the increasing human population in some regions.

× B controlled fires are now set in protected plains regions in the Midwest to mimic the wildfires that are part of the natural cycle of growth.

× C non-native species of insects are introduced unintentionally in the larger region and end up impacting protected areas, such as the proliferation of the brown marmorated stink bug in mid-Atlantic states.

× D in the Lake Clark National Park and Preserve in Alaska, the frozen tundra remains undisturbed, with its flora and fauna populations almost unchanged for centuries.

One of the longest-lived unions between major American artists involved avant-garde painter June Leaf and documentary photographer Robert Frank. Married in 1971, _____ between the New York City arts scene and rural Nova Scotia until Frank's death in 2019.

PREV. QUESTION NEXT QUESTION

15. Which choice completes the text so that it conforms to the conventions of Standard English?

× A the division of Leaf and Frank's activities was

× B Leaf and Frank divided their activities

× C Leaf and Frank's divided activities were

× D activities by Leaf and Frank were divided

It is a common misconception that wildfire smoke smells like a campfire. However, due to the extensive scale of wildfires, volatile organic compounds (VOCs) such as benzene and butene permeate the air and can carry a smell comparable to rubber or _____ many VOCs are carcinogens, experts recommend limited exposure to outside environments affected by wildfire smoke.

While researching a topic, a student has taken the following notes:

- The Changzhou comb is a variety of hand-painted comb that has been produced in China for thousands of years.
- Hand-painted Changzhou comb production dates back to the Eastern Zhou dynasty in China (770–221 BCE).
- Changzhou combs are produced using wood, animal bones, or bamboo.
- They are produced using 72 different processes, including painting, carving, engraving, and heating.
- A Changzhou comb produced in 1915 and given out as a gift during the Shanghai World Expo was sold at an auction in 2021.

PREV. QUESTION NEXT QUESTION

25. The student wants to emphasize the intricacies of producing Changzhou combs. Which choice most effectively uses relevant information from the notes to accomplish this goal?

× A Changzhou combs are produced using many different materials, including wood, bones, and bamboo.

× B The first Changzhou combs were produced over two thousand years ago, with some dating back to the Eastern Zhou dynasty in China.

× C Changzhou combs are hand-painted and can be made with a variety of materials, using over 70 different processes during production.

× D The Changzhou comb sold at the auction at the Shanghai World Expo is regarded as especially exquisite.

While researching a topic, a student has taken the following notes:

- The origin of the Maya civilization is generally dated from 1500 BCE and was found around the Yucatán Peninsula of Mexico.
- The Maya used a vigesimal system for calculations, which means that their number system used a base system of 20, rather than 10 like the current Hindu-Arabic number system.
- The Maya used their number system to track current and future calendar events, as well as historical timelines.
- Only three symbols were used in the Maya number system: a dot, a bar, and a shell to represent one, five, and zero, respectively.
- The Maya produced accurate astronomical observations and were able to measure the length of the solar year, as well as the length of the lunar month.

PREV. QUESTION NEXT QUESTION

26. The student wants to highlight differences between the Maya number system and the Hindu-Arabic number system. Which choice most effectively uses relevant information from the notes to accomplish this goal?

× A Originating around 1500 BCE, the Maya used their number system to track current and future calendar events, as well as historical timelines.

× B The Maya's estimated length of the solar year and the lunar month approximated modern calculations.

× C While the Hindu-Arabic number system uses a base system of 10, the Maya employed a vigesimal system with a base system of 20.

× D Unlike the Hindu-Arabic counting system, the Maya counting system only used three symbols: a dot, a bar, and a shell.

While researching a topic, a student has taken the following notes:

- Born in Spain in 1908, Remedios Varo was a Spanish-born surrealist painter who lived in Mexico for most of her career until her death in 1963.
- Varo cited her father as an early influence for her work, as he shared texts about science, mysticism, and philosophy with her as a child. He also offered her technical drawings to copy.
- As a member of the Surrealist movement, Varo participated in the International Surrealist Exhibitions in Paris and Amsterdam in 1938.
- Varo's art often combined scientific imagery with fantastical elements, reflecting her fascination with both the scientific world and the mystical world.
- In 1971, a retrospective exhibition at the Museum of Modern Art in Mexico City drew the largest audiences in the museum's history.
- In 2019, Varo's 1955 painting *Sympathy (The Madness of the Cat)* sold for $3.1 million at an auction in New York City.

PREV. QUESTION

27. The student wants to highlight various characteristics and influences in Varo's art. Which choice most effectively uses relevant information from the notes to accomplish this goal?

✖ A After Remedios Varo's death, a retrospective exhibition at the Museum of Modern Art in Mexico City drew the largest audiences in the museum's history, and her 1955 painting *Sympathy (The Madness of the Cat)* sold for $3.1 million at an auction in New York City.

✖ B Although Remedios Varo was born in Spain in 1908, she lived in Mexico for most of her artistic career.

✖ C The painting *Sympathy (The Madness of the Cat)* is a quintessential hallmark of Varo's artwork as it perfectly captures Varo's profound interest in fantasy elements.

✖ D Remedios Varo's surrealist works include both scientific and fantastical elements, which she attributed to books on science and mysticism that she received from her father as a child.

- A diffident
- B commendable
- C recalcitrant
- D congenial

In contemporary cultural conversations in the United States, there has been increasing emphasis on generational differences. However, the validity of such distinctions is debatable given their basis in arbitrary 15-year divisions. For instance, "Gen Z" spans from 1997 to 2012. It remains questionable whether a 25-year-old today has more shared experiences with a 10-year-old than a 27-year-old. While some generalizations hold true, others may not be helpful or completely accurate.

PREV. QUESTION | NEXT QUESTION

6. Which choice best states the function of the underlined sentence in the text as a whole?

- A To illustrate the subjective nature of generational distinctions
- B To prove that 25-year-olds are different from 10-year-olds
- C To explain why 25-year-olds have more in common with their peers than with others
- D To disprove the idea a generational identity conveys any meaning at all

The epistolary art is nearly extinct, possibly attributed to technology enabling instant forms of communication. While email has taken precedence as the preferred medium for personal expression, no collection of email exchanges has ever achieved the same degree of literary merit as epistolary compilations like Pliny's accounts of ancient Rome. This might be due to the short time email has had to develop, but it might also be due to a lack of time in the average person's day to draft longer emails.

PREV. QUESTION NEXT QUESTION

7. Which choice best states the main purpose of the text?

× A To make a claim and then defend it with evidence

× B To explain a phenomenon with historical context

× C To provide an observation and reflect on its possible causes

× D To call for a change in the behavior of the average person

This text is adapted from Edgar Allan Poe's 1820 poem "A Dream Within a Dream."

You are not wrong who deem
That my days have been a dream;
Yet if hope has flown away
In a night, or in a day,
In a vision, or in none,
Is it therefore the less gone?
All that we see or seem
Is but a dream within a dream.

PREV. QUESTION NEXT QUESTION

8. Which choice best describes the overall structure of the text?

× A The speaker defends an idea, then admits to temporarily doubting the same idea.

× B The speaker addresses the audience directly, then analyzes the nature of reality.

× C The speaker expresses solidarity with an audience, then challenges that audience to take action.

× D The speaker speculates about a troubling question, then links those speculations to a precise event.

America's second president, John Adams, is an underappreciated Founding Father. Often overshadowed by his predecessor, George Washington, and his successor, Thomas Jefferson, Adams contributed significantly to early American history. He was an active revolutionary who condemned Britain's taxation of the American colonies and signed the Declaration of Independence. He worked as a diplomat during the Revolutionary War, representing the new country abroad. During his time in office, Adams prevented a tense relationship with France from escalating into armed conflict. His most important contribution, however, came at the end of his presidency when he quietly left office after losing reelection; historians credit this precedent set by John Adams for the predominantly peaceful transfer of power in American history.

PREV. QUESTION NEXT QUESTION

9. Which choice best states the main idea of the text?

× A Though unknown to most Americans, John Adams was the most impactful president in history.

× B John Adams' career focused on opposing British taxation and advocating for the rights of American colonists.

× C John Adams set the precedent for a peaceful transfer of power, leaving an indelible mark on American politics.

× D John Adams played an important role in American history as a revolutionary, diplomat, and president.

The following is adapted from the introduction to Book I of Frances Burney's 1796 novel *Camilla*.

> The historian of human life finds less of difficulty and of intricacy to develop, in its accidents and adventures, than the investigator of the human heart in its feelings and its changes. In vain may Fortune wave her many-colored banner, alternately regaling and dismaying, with hues that seem glowing with all the creation's felicities, or with tints that appear stained with ingredients of unmixed horrors; her most rapid vicissitudes, her most unassimilating eccentricities, are mocked, laughed at, and distanced by the wilder wonders of the Human Heart.

PREV. QUESTION NEXT QUESTION

10. Which choice best states the main idea of the text?

× A Fortune cannot be comprehended without the help of historians and investigators.

× B The destiny of every person, whether joyful or terrifying, is decreed by fortune.

× C Historians encounter fewer challenges than investigators because historians know the human heart.

× D Human emotions can be more difficult to understand than events in one's life.

Comparison of Telehealth vs. In-Person Patient Care Visits		
	2017	2020
Telehealth	8%	46%
In-Person	92%	54%

Telehealth, or healthcare services through digital communication technologies, has experienced significant growth in recent years. For instance, approximately 65 percent of hospitals in the US offered telehealth services in 2016; by 2017, this figure had increased to around 76 percent. This growth extends even to areas of medical care that typically require in-person interaction, such as physical therapy (PT). While medical practitioners cannot physically assist patients through a computer screen, they can still provide effective remote treatment in various ways. Patients seem to find value in telehealth as well: for example, at one particular PT center,

_____

PREV. QUESTION NEXT QUESTION

11. Which choice most effectively uses data from the table to complete the example?

× A the percentage of in-person visits decreased from 92 percent in 2017 to 8 percent in 2020.

× B the percentage of in-person visits decreased from 54 percent in 2017 to 46 percent in 2020.

× C the percentage of telehealth visits increased from 8 percent in 2017 to 46 percent in 2020.

× D the percentage of telehealth visits increased from 8 percent in 2017 to 92 percent in 2020.

A new literary genre has emerged as a counterpoint to the previous fixation on dystopias: stories depicting a grim future are being replaced with a more optimistic narrative. Becky Chambers, author of *Record of a Spaceborn Few*, is one such author embodying the "hope punk" fiction subgenre, which features characters collaborating to fight injustice and achieve positive change within their communities. According to literary journalist Ellen Gamerman, it is likely the popularity of this novel subgenre will continue to rise, especially with younger populations, in the coming years.

PREV. QUESTION NEXT QUESTION

12. Which finding, if true, would most directly support the journalist's claim?

× A Demand for dystopian fiction has steadily decreased in recent years: in 2014, over 5 million copies of dystopian fiction were sold, compared to 850,000 in 2021.

× B Becky Chambers is a two-time Hugo Award winner and has been nominated for many other awards, such as the Women's Prize for Fiction, the Nebula Award, the Locus Award, and the Arthur C. Clarke Award.

× C The 2022 Hugo Awards, which recognize the most impactful and highly received science fiction novels of the year, mostly nominated books that address themes such as connection and collaboration.

× D A recent survey has shown how readers' tastes and preferences in fiction have shifted since the 2020 US presidential election.

Character Building is a 1902 book by Booker T. Washington. In the book, Washington argues that neither pure optimism nor pure pessimism can lead to meaningful achievement. Those who hope to make meaningful contributions to society must instead balance positive and negative mindsets:

_____

PREV. QUESTION NEXT QUESTION

13. Which quotation from *Character Building* most effectively illustrates the claim?

A "I think I am right in saying that the persons who accomplish most in this world, those to whom on account of their helpfulness the world looks most for service—those who are most useful in every way—are those who are constantly seeing and appreciating the bright side as well as the dark side of life."

B "It is comparatively easy to perform almost any kind of work, but the value of any work is in having it performed so that the desired results may be most speedily reached, and in having the means with which the worker labours arranged so as to meet certain ends."

C "You ought to realize that your actions will not affect yourselves alone. In this age it is almost impossible for a man to live for himself alone. On every side our lives touch those of others; their lives touch ours. Even if it were possible to live otherwise, few would wish to."

D "A narrow life, a selfish life, is almost sure to be not only unprofitable but unhappy. The happy people and the successful people are those who go out of their way to reach and influence for good as many persons as they can."

Changes in the US Agricultural Industry from 1930–1997

Year	Farms (in millions)	Total acres (in millions)	Average farm size (in acres)
1930	6.3	987	157
1940	6.1	1,061	174
1950	6.4	1,161	216
1959	3.7	1,123	303
1969	2.7	1,062	389
1982	2.2	987	440
1992	1.9	946	491
1997	1.9	932	487

In the 20th century, the agricultural industry in the United States experienced significant changes due to developments in technology. Due to advances in farm machinery (such as the introduction of tractors and harvesters), fewer humans and animals were needed for farm labor because of an increase in efficiency. This subsequently led to a decrease in the number of farms, although this was compensated by an increase in average acreage. According to the US Department of Agriculture, in 1920, the US had 6.4 million farms spanning 956 million acres, with the average farm covering 148 acres. With the evolution of machinery, _____

14. Which choice most effectively uses data from the table to complete the text?

× A the total acreage of farms in the US increased to a high of 1,123 million acres in 1959, which effectively increased the total output of crops.

× B in 1997, the average farm size increased to 487 acres, demonstrating the improved efficiency in the agricultural system.

× C there were only 1.9 million farms in the US in 1992, almost a third of the number 70 years earlier; however, each farm was approximately three times larger on average.

× D from that point on, the number of farms consistently fell, while the total number of acres stayed the same, corresponding to an increase in efficiency.

In his 1949 book *The Hero with a Thousand Faces*, Joseph Campbell compares the mythology of various cultures. According to Campbell, storytelling patterns among civilizations often integrate Jungian archetypes of heroic journeys and creation narratives because they resonate with the general human experience. Therefore, finding a new film or book that tells a familiar story may be less of a matter of plagiarism than _____.

15. Which choice most logically completes the text?

× A a natural outgrowth of the human need for connection and belonging.

× B a distinctive expression of a unique cultural ideals and values.

× C an attempt to tap into universal themes that still connect with audiences today.

× D an inevitable limitation in the possible ways to tell a story.

Though not commonly considered as a potential energy source, nuclear fusion power offers many advantages. It can generate millions of times more energy than burning gasoline, with lower levels of hazardous radioactivity and reduced risk of accidents compared to nuclear fission. Nevertheless, despite recent breakthroughs, practical fusion energy production remains a challenge—achieving and sustaining the conditions necessary for safe nuclear fusion is highly complex, time-consuming, and expensive. Given these factors, it is estimated that useable fusion energy may still be fifty years away. Thus, _____

PREV. QUESTION NEXT QUESTION

16. Which choice most logically completes the text?

× A because of these major obstacles, there is no reason for scientists to pursue nuclear fusion as a power source.

× B once key obstacles are overcome, nuclear fusion could emerge as the optimal solution for meeting future energy demands.

× C nuclear fusion will never be able to compete with the cost, convenience, or environmental advantages offered by conventional energy sources.

× D governments should prioritize the funding of nuclear fusion projects over other alternative energy projects.

Judy Blume is the author of many beloved children's _____ *Tales of a Fourth Grade Nothing*. Her frank discussions of childhood anxieties and family issues have made her a target of censors, so along with pursuing her writing, she has spent considerable time fighting to protect the freedom of speech.

× A In addition,

× B Actually,

× C However,

× D Regardless,

While researching a topic, a student has taken the following notes:

- Pando is a giant quaking aspen tree clone that originated from a single seed and spreads through its extensive root system.
- Located in central Utah in the Fishlake National Forest, it has spread over 106 acres and consists of over 40,000 individual trees.
- When the Pando clone was discovered in 1976, scientists named it after a Latin word meaning "I spread."
- The clone and its root system are estimated to be about 12,000 years old.
- The United States Postal Service honored Pando in 2006 with a commemorative stamp as one of the "40 Wonders of America."
- Scientists are concerned about Pando as it shows signs of decline due to lack of regeneration and vulnerability to insects and disease.

PREV. QUESTION

27. The student wants to emphasize the impressive size and longevity of Pando. Which choice most effectively uses relevant information from the notes to accomplish this goal?

× A Though Pando is thought to be about 12,000 years old, scientists worry about its longevity due to signs of decline from lack of regeneration, as well as vulnerability to insects and disease.

× B Discovered by scientists in 1976, Pando was named for a Latin word that means "I spread" in honor of its coverage of 106 acres.

× C Estimated to be about 12,000 years in age, Pando covers an impressive 106 acres with more than 40,000 individual trees.

✖ D Thought to be nearly 40,000 years old, Pando is considered one of the oldest and largest root systems in the world.
