INNOVATOR TEST 6
MODULE 1 R&W

One of the largest empires in history was the Mongol Empire. Led by charismatic generals, the Mongols conquered peoples from Central Asia to Central Europe. Though brutal in warfare, Mongol kings, or khans, were _____ rulers and permitted their subjects to travel, trade, and practice religion without restrictions as long as they paid an annual tribute.

1. Which choice completes the text with the most logical and precise word or phrase?

× A amicable

× B oppressive

× C apathetic

× D tolerant

Charles Darwin developed a method of diagramming plant movements that allowed him to _____ the mysteries of how plants respond and adapt to their environment. Darwin's diagrams provided a visual depiction of plant movements, capturing their various positions and orientations in response to specific stimuli and enabling him to understand the mechanisms behind these movements.

2. Which choice completes the text with the most logical and precise word or phrase?

× A shroud

× B convey

× C unravel

× D acquire

Chef and food writer Samin Nosrat challenges traditional culinary norms by advocating for a simpler and more intuitive approach to cooking. Her cookbook *Salt, Fat, Acid, Heat* emphasizes the importance of these four basic elements in creating delicious meals, rather than relying on _____ recipes or techniques.

PREV. QUESTION | NEXT QUESTION

3. Which choice completes the text with the most logical and precise word or phrase?

× A unpalatable

× B incoherent

× C labyrinthine

× D kaleidoscopic

The following text is from Anna Julia Cooper's 1892 book *A Voice From the South*.

> In politics, the two great forces, commerce and empire, which would otherwise have shaped the destiny of the country, have been made to pander and cater to Southern notions. "Cotton is King" meant the South must be allowed to dictate or there would be no fun. Every statesman from 1830 to 1860 exhausted his genius in persuasion and compromises to smooth out her ruffled temper and gratify her petulant demands. But like a sullen younger sister, the South has pouted and sulked and cried: "I won't play with you now; so there!" and the big brother at the North has coaxed and compromised and given in, and—ended by letting her have her way.

PREV. QUESTION | NEXT QUESTION

4. Which choice best describes the overall structure of the text?

× A It criticizes the deference given to the South, then accentuates that criticism with a sibling analogy.

× B It disparages Southern commerce driven by slavery, then attacks Southern culture and values.

× C It calls for the South to be left alone, then mocks those who insist on interfering in Southern affairs.

× D It argues for a gentler approach to Southern politics, then states the South should be treated like a younger sister.

Text 1:
Ebooks are inferior to print books. They lack the tactile experience of holding a physical book, the smell of the pages, not to mention the aesthetic appeal, including unique cover designs, typography, and the overall feel from cover to cover. While these details may seem minor, it is the culmination of such things that create a multi-sensory experience for readers holding a print copy in their hands that is far more memorable than tapping on a screen.

Text 2:
Ebooks offer many advantages over print books, such as the ability to adjust font size, search for specific text, and carry an entire library in a single device. In fact, most ereaders can hold, as a conservative estimate, over 1,000 books. In this regard, ebooks can be more environmentally friendly as they do not require paper, ink, or shipping.

PREV. QUESTION NEXT QUESTION

5. Based on the texts, how would the author of Text 2 most likely respond to the claims of the author of Text 1?

× A By suggesting that ebooks can offer a multi-sensory experience as well, such as a text-to-speech feature

× B By stating that the aesthetic appeal of ebooks lies in their sleek and minimalist design

× C By arguing that the benefits of ebooks outweigh the loss of the tactile experience and aesthetic appeal of physical books

× D By admitting that ebooks are only suitable for people who prioritize convenience over the overall reading experience

The following text is from Horatio Alger's 1872 novel *Strive and Succeed; or the Progress of Walter Conrad*. Here, Allen Barclay has offered Walter a teaching position.

> Allen Barclay, accompanied by Walter, approached the schoolhouse. It was a plain wooden building of two stories, painted white. Beside it was a good-sized playground, on which from a dozen to twenty boys were engaged in a game of ball. As Walter saw the ball flying across the field, impelled by a hard knock from the bat, he felt a strong impulse to join in the game. When a student at the Essex Institute he had played ball a good deal, and was considered quite a superior player. But since his departure he had not joined in a game.

PREV. QUESTION NEXT QUESTION

6. Which choice best states the main idea of the text?

× A Walter decides to demonstrate his skill as an athlete.

× B Walter is anxious about winning the respect of the boys playing ball.

× C Walter hopes that Allen Barclay will provide useful guidance.

× D Walter feels drawn to a familiar sport from his time as a student.

Iconic forms characterize Camille Norment's art installations, which urge a new appreciation of historical locations and objects. In 2002, she transformed New York's Dia Chelsea Gallery into a genre-bending sonic experiment, centering one exhibition space on a bell-like brass sculpture and piping in audio feedback from 1960s and 1970s broadcasts. Norment's 2008 composition *Triplight* achieved a different kind of immersion with historical undertones: a 1955 Shure microphone—a favored device of jazz legends such as Ella Fitzgerald—was reconfigured to project pulsing bands of light onto gallery walls.

PREV. QUESTION NEXT QUESTION

7. According to the text, what is the role of the microphone apparatus in *Triplight*?

× A It alludes to an Ella Fitzgerald performance.

× B It broadcasts a jazz recording.

× C It emits light onto nearby surfaces.

× D It resembles the shape of the Dia Chelsea sculpture.

"The Monkey's Paw" is a 1902 American short story by W.W. Jacobs. It is often considered a "three wishes" tale, as it features a magical talisman, the monkey's paw, which grants its owner three wishes, but always at an unintended cost. Thus a major theme of the story is to be wary of trying to fix the inevitable, as demonstrated when Sergeant-Major Morris says the following: _____

PREV. QUESTION NEXT QUESTION

8. Which quotation from "The Monkey's Paw" most effectively illustrates this claim?

× A "[Old Fakir] wanted to show that fate ruled people's lives, and that those who interfered with it did so to their sorrow."

× B "I did have some idea of selling [the talisman], but I don't think I will. It has caused me enough mischief already."

× C "If you keep [the talisman], don't blame me for what happens. Pitch it on the fire like a sensible man."

× D "If you must wish...wish for something sensible."

Nutrient	Kamut	Control Group
ALA (g/100 g)	16.2	44.1
Carbohydrates (g/100 g)	62.31	61.46
DHA (g/100 g)	<0.2	<0.2
EPA (g/100 g)	<0.2	<0.2
Fat (g/100 g)	7.32	5.96
Selenium (mg/kg)	1.12	0.1
Total Fiber (g/100 g)	9.9	10.3

Ancient grains, such as kamut or farro, have gained popularity in recent years due to their perceived nutritional benefits compared to modern grains. They also have a lower glycemic index than modern grains, which can help regulate blood sugar levels. Caterina Trozzi and a team of other researchers compared the effects of a diet based on kamut products to a similar diet based on modern wheat products. Blood tests were performed before and after the study, and the team concluded that kamut wheat products may be helpful in reducing markers associated with the development of type-2 diabetes. One possible explanation for this effect is kamut's high selenium content, which can increase enzyme activity involved in EPA and DHA synthesis.

PREV. QUESTION NEXT QUESTION

9. Which choice best describes data from the table that support Trozzi and her team's conclusion?

✖ A The DHA content of kamut is the same as the modern grain products, which indicates both kamut and modern grain products have equal nutritional benefits.

✖ B There is not a significant source of EPA in kamut (<0.2), but it is considerably higher in ALA compared to other nutrients (16.2 g/100 g).

✖ C The selenium content is considerably higher in kamut compared to modern grain products.

✖ D Kamut contains 62.31 grams of carbohydrates and 7.32 grams of fat (per 100 grams), which is higher than modern grain products.

Social psychologist Roy Baumeister and communications professor Brad Bushman posit a theory about what drives political tension between liberals and conservatives. They hypothesize that conservatives value amassing resources while liberals value distributing them. According to the researchers, conflict arises when each group disregards the other group's values; conflict resolves when both groups recognize that a functioning society requires both the accumulation and distribution of resources.

PREV. QUESTION NEXT QUESTION

10. Which finding, if true, would most directly weaken the researchers' hypothesis?

× A Conservatives are more likely to donate to charity than liberals.

× B The wealthiest Americans overwhelmingly identify as conservative.

× C Liberals are more likely to unfollow news sources that contradict their views.

× D Voters tend to become more conservative as they age.

Impact of Study Methods on GPA

Method	Weekly Studying	GPA
Flashcards	8 hours	3.8
Self-quizzing	7 hours	3.9
Reading Textbooks	16 hours	3.1
Reviewing Notes	19 hours	3.2

To assess the effectiveness of different study techniques among college undergraduates, researchers at a local university conducted a comprehensive semester-long study. They collected data from a diverse sample of students, tracking their academic performance and study habits. The researchers wanted to identify any correlation between study methods and GPA. They concluded that retrieval studying techniques, in which students recall material from memory, led to higher retention than reviewal techniques, in which students reread information. For instance, _____

PREV. QUESTION NEXT QUESTION

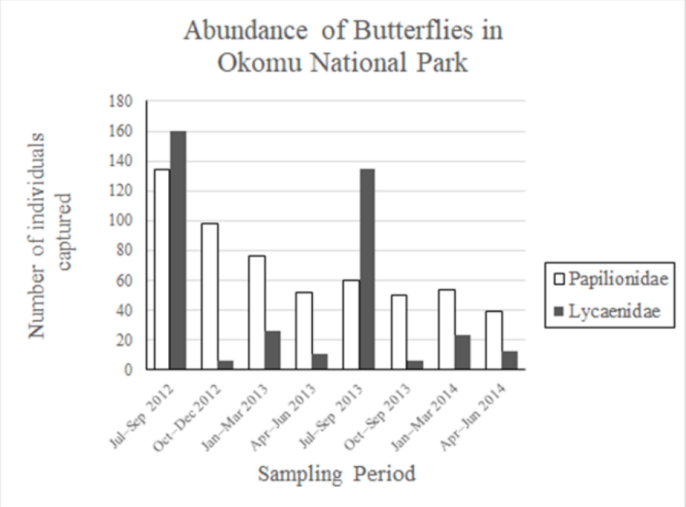

11. Which choice most effectively uses data from the table to complete the statement?

✖ A students who studied using flashcards received higher GPAs with half the studying time compared to those who reread their textbooks.

✖ B students who spent at least ten hours a week reading their textbooks and notes received adequate GPAs of 3.1 and 3.2.

✖ C students who self-quizzed received a higher GPA while studying for fewer hours than students who used flashcards.

✖ D students who studied for longer periods per week earned a higher GPA compared to those who spent less time studying.

Biologists Ojianwuna and Umoru studied butterfly distribution and abundance in Okomu National Park, Nigeria. They hypothesized that butterflies were only present in the park in the wet season (July–September) and migrated to other parks in the dry season (January–March). The researchers set up nets to count the number of individuals of butterfly families *Papilionidae* and *Lycaenidae*. After 2 years, the researchers concluded that *Papilionidae* were less affected by the weather than previously thought, while *Lycaenidae* numbers erupted during the wet season due to the proliferation of its preferred plant.

PREV. QUESTION NEXT QUESTION

12. Which choice best describes data from the graph that support the researchers' conclusion?

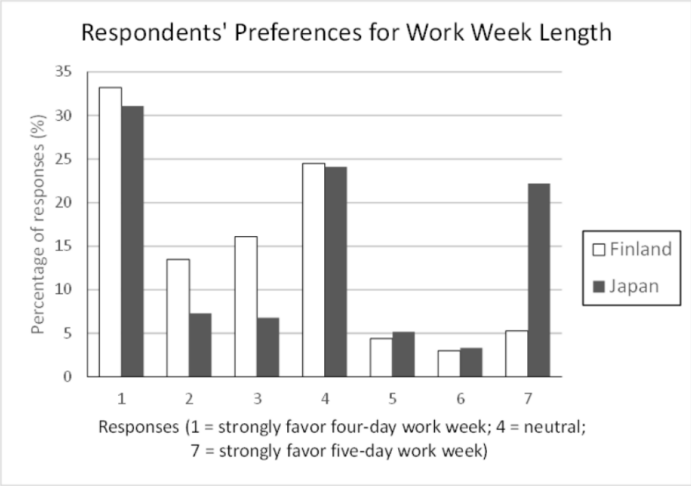

× A *Papilionidae* numbers dropped to insignificant numbers in the dry seasons from 2012 to 2014, while the *Lycaenidae* had its peaks in the wet seasons from 2012–2014.

× B The number of *Papilionidae* captured peaked in the dry seasons of 2012 and 2013, whereas the *Lycaenidae* samples were between approximately 40 and 135 individuals.

× C The number of *Papilionidae* species was notably high in the wet season

× C The number of *Papilionidae* species was notably high in the wet season and slightly decreased in the dry season, whereas the *Lycaenidae* species proliferated in the dry seasons.

× D Although *Papilionidae* were more abundant in the wet season of 2012, they were still present during other seasons, whereas *Lycaenidae* were less prevalent during the dry season.

For decades, the five-day 9–5 (eight hour) work week has been standard; however, certain companies have started implementing a four-day work week, with employees working ten hours per day. A student interviewed workers from Finland and Japan to assess their preferences. After reviewing the results, they concluded that workers from both countries generally preferred the system with fewer days and more hours per day.

PREV. QUESTION NEXT QUESTION

13. Which choice best describes data from the graph that undermine the student's conclusion?

✖ A Over 30% of respondents from both Japan and Finland were strongly in favor of the four-day work week, but approximately 25% of respondents from both countries were neutral.

✖ B Approximately 33% of respondents from Finland and 23% of respondents from Japan strongly preferred the four-day work week.

✖ C Over 30% of respondents from Finland indicated that they strongly preferred a 4-day work week, compared to over 20% of respondents who indicated that they preferred a 5-day work week.

✖ D While approximately 31% of respondents from Japan strongly preferred the four-day work week, a similar percentage was either neutral or strongly preferred the five-day work week.

Jazz is an incredibly complex musical genre. Each musician must be deeply proficient with their own instrument as well as attuned with the styles and abilities of their bandmates. This allows each player to essentially improvise their own part without clashing with anyone else's. Jazz is therefore often chaotic and unstructured, leading to the genre being regarded as inaccessible. However, the mainstream success of jazz-inspired musicians such as Louis Armstrong suggests that _____

PREV. QUESTION NEXT QUESTION

14. Which choice most logically completes the text?

× A most music listeners want artists to integrate more jazz elements in their music, such as improvisation.

× B Louis Armstrong primarily performed songs that are chaotic and unstructured.

× C music with jazz characteristics can have more popular appeal than jazz's reputation would suggest.

× D jazz musicians would be more likely to experience mainstream success if their music incorporated more genres.

Soft robotics is an emerging field of _____ on the development of robots made of soft and flexible materials, such as rubber and silicone. One of the main advantages of "soft robots" is that they can adapt to complex and dynamic environments, making them suitable for a wide range of applications, including healthcare, agriculture, and exploration.

- B Ultimately,
- C Actually,
- D Furthermore,

While researching a topic, a student has taken the following notes:

- UC Berkeley researchers investigated the link between sleep disruption in elderly people and memory loss conditions.
- Slow-wave sleep is responsible for memory consolidation and clearing amyloid-beta plaques, the latter of which may contribute to the development of Alzheimer's disease.
- Aging results in a reduction of slow-wave sleep
- Researchers recommend interventions such as cognitive-behavioral therapy, which involves working with a clinician to change the way the patient sleeps.
- The study found that quality sleep is crucial to one's health regardless of age and can help prevent more serious conditions in the future.

PREV. QUESTION NEXT QUESTION

26. The student wants to emphasize the importance of sleep quality for elderly adults based on the findings of the study. Which choice most effectively uses relevant information from the notes to accomplish this goal?

✖ A Elderly people who do not get quality sleep have elevated risk for memory loss conditions such as Alzheimer's.

✖ B Sleep quality is important for all age groups because it can prevent most health conditions before they require costly treatments.

✖ C Elderly people do not get as much slow-wave sleep, so achieving quality sleep is more challenging compared to a younger group.

✖ D Elderly people can improve the quality of their rest through cognitive-behavioral therapy, which can change the way patients sleep.

While researching a topic, a student has taken the following notes:

- Sir Frederick William Herschel, a musician and astronomer, lived from 1738 to 1822.
- He discovered the planet Uranus in the 1780s.
- Herschel observed star clusters and developed theories of star formation from the 1780s onwards.
- He used a prism to detect infrared radiation, publicizing this discovery in the early 1800s.
- Infrared radiation is characterized by low frequencies and can only be seen by humans with the assistance of devices, such as infrared telescopes.

PREV. QUESTION NEXT QUESTION

27. The student wants to introduce Herschel's discoveries to an audience unfamiliar with infrared radiation. Which choice most effectively uses relevant information from the notes to accomplish this goal?

✖ A Herschel's work on theories of star formation coincided with his discovery of the planet Uranus.

✖ B Infrared radiation, which is low in frequency and mostly invisible to humans, was known to astronomers centuries ago.

✖ C Herschel employed a prism to detect infrared light, though other devices, such as infrared telescopes, can now reveal infrared radiation.

✖ D Herschel discovered the planet Uranus, and he also detected the presence of infrared radiation, which is typically invisible to the naked eye due to its low frequency.

MODULE 2B (HARDER)

Johann Sebastian Bach is widely considered to be a _____ of classical music. His music and compositional techniques were highly influential in shaping the Baroque period and laid the foundation for later Classical and Romantic musical styles. Many of the musical conventions and techniques he developed, such as the use of counterpoint and the concept of musical motifs, would become fundamental to future classical music composers.

5. Which choice completes the text with the most logical and precise word or phrase?

- A protracted
- B historic
- C sporadic
- D tenacious

The Australian "daddy longlegs" spider is often mischaracterized as the most dangerous in the world. In reality, the spider's venom is not at all threatening to people; a daddy longlegs bite would have the effect of a small pinch on human skin. Moreover, these spiders actually benefit humans because they eat harmful domestic insects, like black widows. Despite their name, daddy longlegs can be male or female. Female daddy longlegs are nurturing mothers, as they carry their eggs around in a small bag made of web until they are ready to hatch.

PREV. QUESTION | NEXT QUESTION

6. Which choice best states the main purpose of the text?

- A To exemplify the dangerous nature of daddy longlegs venom
- B To compare the daddy longlegs spider to the black widow
- C To outline the many ways daddy longlegs spiders help humans
- D To refute misconceptions about the daddy longlegs spider

A study led by Dr. Robin Dunbar aimed to investigate the role of laughter in social bonding and prosocial, or altruistic, behavior. The experiment recruited 66 subjects to watch a comedy or control video alone or in groups. The researchers then measured the subjects' laughter response and then asked the subjects to complete a social or donation-related task. The study found that laughter triggers the endorphin system and enhances social bonding, but it does not reliably influence donation-related behavior. The findings suggest that social bonding and prosociality may be driven by different factors and may have different impacts depending on the individual.

PREV. QUESTION NEXT QUESTION

7. Which choice best states the function of the underlined sentence in the text as a whole?

✖ A To provide a summary of the study's findings related to how laughter positively influences some behavior but not others.

✖ B To examine the implications regarding how laughter correlates to altruistic behavior

✖ C To convey the connection between laughter and the release of endorphins and how this relates to social bonding

✖ D To describe how laughter is a crucial element of social bonding and can potentially positively influence altruistic behavior.

Text 1

According to the Food Pairing Theory, the more flavors ingredients share, the tastier their combination. For instance, macaroni, cheese, butter, flour, and milk have similar flavors and come together in a delicious dish: mac and cheese. Applying this principle, combining pineapple, tomato sauce, cheese, and bread would be unappealing, as pineapples theoretically pair better with citrus or tropical fruits rather than pizza.

Text 2

In her 2012 book *Taste*, Barb Stuckey claims that the human body has a natural affinity for the combination of sweet and salty foods. Humans enjoy sweet foods because the sweet taste denotes high calories, thus providing energy. On the other hand, humans crave salty foods because the human body lacks a storage system for sodium, unlike minerals such as calcium, which are stored in bone tissue. When sweet and salty tastes are combined, they create a satisfying flavor experience, which could explain why many people enjoy seemingly conflicting pairings.

PREV. QUESTION NEXT QUESTION

8. Based on the texts, how would the author of Text 2 most likely characterize the Food Pairing Theory as described in Text 1?

✖ A As irrelevant, because it overlooks factors such as cultural preferences that may impact taste preferences.

✖ B As obsolete, because recent research has shown that flavor preferences are subjective and not correlated to any reliable explanation.

✖ C As comprehensive, because it encompasses the reasons why humans crave certain food pairings.

✖ D As inadequate, because there is a reason that conflicting flavors pair well.

During the late 1970s, Americans experienced a period of economic malaise characterized by “stagflation” (a term describing stagnant wage growth and the runaway inflation of rising prices) as well as an oil shortage that resulted in hours-long lines at gas stations. These problems were coincidental but not related to the same basic cause. Historians have pointed out that choices made by oil producers abroad most likely resulted in the long gas lines, whereas stagflation was a consequence of US domestic policies involving government spending.

PREV. QUESTION NEXT QUESTION

9. According to the text, in what way was the oil shortage connected to stagflation in the 1970s?

✖ A Stagflation and the oil shortage occurred simultaneously but were not causally related.

✖ B The price increases associated with stagflation were aggravated by the oil shortage.

✖ C The oil shortage made it harder to combat new policies related to stagflation.

✖ D Stagflation preceded the oil shortage, further exacerbating the rise in gas prices.

"Children of Peace" is a 1912 short story by Sui Sin Far. In the story, Liu Venti and Pau Tsu are a young married couple who have relocated from China to the United States, a life change that the two immigrants see as challenging, yet fulfilling: _____

PREV. QUESTION NEXT QUESTION

10. Which quotation from "Children of Peace" most effectively illustrates the claim?

A "[Liu Venti and Pau Tsu] sat beneath the shade of a cluster of tall young pines forming a perfect bower of greenness and coolness on the slope of Strawberry hill. Their eyes were looking ocean-wards, following a ship nearing the misty horizon. Very serious were their faces and voices."

B "That ship, sailing from west to east, carried from each a message to his and her kin—a message which humbly but firmly set forth that [Liu Venti and Pau Tsu] were resolved to act upon their belief and to establish a home in the new country."

C "The last little scholar of Pau Tsu's free class for children was pattering out of the front door when Liu Venti softly entered the schoolroom. Pau Tsu was leaning against her desk, looking rather weary. She did not hear her husband's footstep, and when he approached her and placed his hand upon her shoulder she gave a nervous start."

D "It was seven years since Liu Venti and Pau Tsu had begun their work in San Francisco's Chinatown; seven years of struggle and hardship, working and waiting, living, learning, fighting, failing, loving—and conquering."

Ethan Frome is a 1911 short novel by Edith Wharton. In the novel, Wharton depicts a love story in which every aspect of Ethan's world reminds him of Mattie, a young woman who assists him on the farm: _____

PREV. QUESTION NEXT QUESTION

11. Which quotation from *Ethan Frome* most effectively illustrates the claim?

A "The winter morning was as clear as crystal. The sunrise burned red in a pure sky, the shadows on the rim of the wood-lot were darkly blue, and beyond the white and scintillating fields patches of far-off forest hung like smoke."

B "The fact that admiration for his learning mingled with Mattie's wonder at what he taught was not the least part of his pleasure."

C "There was hardly a branch against the sky or a tangle of brambles on the bank in which some bright shred of memory was not caught. Once, in the stillness, the call of a bird in a mountain ash was so like her laughter that his heart tightened and then grew large."

D "It seemed to Ethan that his heart was bound with cords which an unseen hand was tightening with every tick of the clock. Twice he opened his lips to speak to Mattie and found no breath."

"A Council of State" is a 1900 short story by Paul Laurence Dunbar. In the story, Luther Hamilton is a powerful and ruthless figure who takes pleasure in his ability to destroy his opponents: _____

PREV. QUESTION NEXT QUESTION

12. Which quotation from "A Council of State" most effectively illustrates the claim?

✖ A "Luther Hamilton was a great political power. He was neither representative in Congress, senator nor cabinet minister. When asked why he aspired to none of these places of honor and emolument he invariably shrugged his shoulders and smiled inscrutably. In fact, he found it both more pleasant and more profitable simply to boss his party."

✖ B "You know, Miss Kirkman, it is our method to help our friends and to crush our enemies. I shall depend upon you to let me know which is which."

✖ C "Had he not just the day before utterly crushed a troublesome opponent? Had he not ruined the career of a young man who dared to oppose him, driven him out of public life and forced his business to the wall? If this were not food for self-congratulation pray what is?"

✖ D "Mr. Hamilton turned to the desk and made out a check. He handed it to Miss Kirkman, saying, 'Cash this, and pack that convention for the administration. I look to you and the people you may have behind you to check any rash resolutions they may attempt to pass. I want you to be there every day and take notes of the speeches made, and their character and tenor.'"

Heart of Darkness is an 1899 novel by Joseph Conrad. In the novel, a first-person narrator gathers with several of his friends. All of these characters have worked as sailors, yet one, Marlow, has an adventurous mentality that sets him apart from the others: _____

PREV. QUESTION | NEXT QUESTION

13. Which quotation from *Heart of Darkness* most effectively illustrates the claim?

A "Between us there was, as I have already said somewhere, the bond of the sea. Besides holding our hearts together through long periods of separation, it had the effect of making us tolerant of each other's yarns—and even convictions."

B "Marlow sat cross-legged right aft, leaning against the mizzen-mast. He had sunken cheeks, a yellow complexion, a straight back, an ascetic aspect, and, with his arms dropped, the palms of hands outwards, resembled an idol."

C "[Marlow] was the only man of us who still 'followed the sea.' The worst that could be said of him was that he did not represent his class. He was a seaman, but he was a wanderer, too, while most seamen lead, if one may so express it, a sedentary life. Their minds are of the stay-at-home order."

D "To [Marlow] the meaning of an episode was not inside like a kernel but outside, enveloping the tale which brought it out only as a glow brings out a haze, in the likeness of one of these misty halos that sometimes are made visible by the spectral illumination of moonshine. His remark did not seem at all surprising. It was just like Marlow."

Frequency and Percentage of Responses to Research Question

Attribute of Farmers	Frequency	Respective Percentage (%)
Sharing with neighbors	16	53
Inviting neighbors to eat a meal	7	23
Helps neighbors	6	20
Plants crops	6	20
Being a hard worker	5	17
Giving gifts to neighbors	5	17
Being a community authority	5	17

Studying social roles in Andean society, anthropologist expert Benjamin Brooks conducted a survey of 30 residents of the Callejón de Huaylas Valley, Peru. The aim of the study was to determine the valuable attributes of farmers in the local community. Given the steep terrain of the Andes, practicing agriculture can be taxing, and economic conditions in the area are marginal. Based on the findings, Brooks concluded that the responses reflect the high regard that the community held for farmers who lent animals or tools for *yunta*, groups of bulls joined using a yoke to plow potato fields.

PREV. QUESTION NEXT QUESTION

14. Which choice best describes data from the table that support the researcher's conclusion?

× A While being a hard worker was infrequently mentioned (in only 17% of the responses), sharing was the most popular response, mentioned in 53% of surveys.

× B Because potato farming in the Andes is laborious, members of the community tended to value farming skills and hard work, which were mentioned 6 and 5 times, respectively.

× C Given the communal nature of the region, respondents valued farmers who shared their crops, with 16 answering "sharing with neighbors" and 7 answering "inviting neighbors to eat a meal."

× D The most valued farmers were those who allowed neighbors to use their bulls or tools in order to distribute resources between community members, with 16% of respondents choosing that option.

During the Industrial Revolution, specialized machines and factories gradually grew to dominate the English textiles market, replacing household-based workers who wove textiles by hand. By the 1850s, the number of operational looms in England was over 100 times as many as at the turn of the nineteenth century, with most of them located in ever-growing urban centers. At the same time, many workers continued to hand-weave independently in their rural homes. These so-called cottage industries were far less efficient and profitable than urban factories, yet remained popular until the very end of the nineteenth century, suggesting that _____

PREV. QUESTION NEXT QUESTION

15. Which choice most logically completes the text?

× A rural workers had strong community ties allowing them to change higher rates for their products.

× B at least some rural workers were able to sustain their businesses despite growing competition from urban factories.

× C factory owners actively discriminated against rural workers with weaving experience.

× D textile factories produced markedly lower-quality products than those from cottage industries and therefore could not charge competitive prices.

A concept within psychology known as social facilitation claims that individuals perform better on tasks when in the presence of others. This phenomena can primarily be observed in tasks in which the individual is already proficient. Psychologist Robert Zajonc argued that this is a result of a "dominant response" effect: the presence of others increases physiological arousal and reduces reliance on conscious thought, leading individuals to respond automatically based on their practiced, trained behaviors. When faced with an unfamiliar and complex task, however, Zajonc would argue that the individual is likely to _____

PREV. QUESTION NEXT QUESTION

16. Which choice most logically completes the text?

× A successfully complete the task because the presence of others will socially facilitate their performance.

× B fail at the task in the presence of others because the complexity of the task will prevent the occurrence of the dominant response effect.

× C make more mistakes in the presence of others because their dominant response is not trained on a practiced response.

× D quickly master the task because the presence of others will facilitate their ability to focus and comprehend the task.

In 2006, Laura Bush, accompanied by Secretary of State Condoleezza Rice, traveled to West Africa in order to witness the historic inauguration of Liberian President Ellen Johnson Sirleaf. A primary objective of the trip, which also included visits to Cape Verde, Ghana, and Nigeria, _____ to strengthen international partnerships as well as foster cultural understanding.

- A However,
- B Likewise,
- C Indeed,
- D Consequently,

While researching a topic, a student has taken the following notes:

- The Chinese paddlefish can grow up to 23 feet in length.
- It was last seen in the wild in 2003.
- This freshwater fish was declared extinct in 2020.
- The largetooth sawfish, a type of saltwater fish, can grow up to 23 feet in length.
- It is one of the species on display at the National Aquarium in Baltimore.
- It is currently classified as critically endangered.

PREV. QUESTION NEXT QUESTION

26. The student wants to compare the conservation status of the Chinese paddlefish and the largetooth sawfish. Which choice most effectively uses relevant information from the notes to accomplish this goal?

✖ A Although classified as critically endangered, the saltwater largetooth sawfish can be seen by visitors at the National Aquarium.

✖ B The Chinese paddlefish was last seen in the wild in 2003, while the largetooth sawfish is currently on display in an aquarium in Baltimore.

✖ C Largetooth sawfish and the currently extinct Chinese paddlefish are capable of growing up 23 feet.

✖ D Unlike the critically endangered largetooth sawfish, the Chinese paddlefish has been declared extinct.

While researching a topic, a student has taken the following notes:

- Bob Ross hosted the television show *The Joy of Painting* from 1974 to 1982.
- Ross encouraged his viewers to paint purely from imagination.
- During each short episode, Ross created a complete landscape using oil paints.
- Ross's own paintings of pine trees, mountains, and snowy terrain recall the landscape of Alaska.
- Ross was stationed in Alaska while serving in the Air Force in the 1960s.

PREV. QUESTION

27. The student wants to emphasize an unusual aspect of Ross's approach to painting. Which choice most effectively uses relevant information from the notes to accomplish this goal?

✖ A Having spent part of the 1960s in the Air Force, Bob Ross later turned his attention to landscape painting.

✖ B In *The Joy of Painting*, Ross demonstrated that a fully-formed work of art could be completed in a short timeframe.

✖ C Despite Ross's emphasis on using imagination as part of the artistic process, his own paintings often depicted landscapes from Alaska.

✖ D Ross created individual paintings while discussing the importance of imagination in episodes of *The Joy of Painting*.
