INNOVATOR TEST 7

MODULE 1 R&W

Because most of the _____ information on coral reefs relates to shallow-water areas, a research team led by Daniel Wagner investigated coral reef ecosystems in remote areas far beyond the coastline. These areas are referred to as the "high seas" and do not fall under the jurisdiction of any country.

NEXT QUESTION

1. Which choice completes the text with the most logical and precise word or phrase?

× A available

× B excessive

× C misleading

× D preposterous

Researchers Michael Duke and Luke Bergmann studied the effects of layoffs in the construction industry by interviewing over 1,000 construction workers. They found that layoffs _____ male workers significantly more than female workers because male workers were more likely to see a layoff as evidence of personal incompetence.

PREV. QUESTION NEXT QUESTION

2. Which choice completes the text with the most logical and precise word or phrase?

× A distressed

× B neutralized

× C supported

× D appeased

Producing photographs in the 1800s was a _____ process. Mathew Brady, who was known for his extensive photographic documentation of the American Civil War, relied on a photographic technique called daguerreotype, which involved preparing a silver-coated copper plate, exposing it to light, developing the image with heated mercury vapor, fixing it with a salt solution, and finally toning the image.

3. Which choice completes the text with the most logical and precise word or phrase?

× A manageable

× B strenuous

× C speculative

× D tenuous

Penicillin, a common antibiotic, was developed in the late 1920s after Dr. Alexander Fleming's fortuitous discovery of an unexpected patch of mold growing on a Petri dish of staphylococcus bacteria. Fleming noted the mold's apparent ability to inhibit bacterial growth, _____ scientific breakthrough that laid the foundations for the development of modern antibiotics.

PREV. QUESTION NEXT QUESTION

4. Which choice completes the text with the most logical and precise word or phrase?

× A a serendipitous

× B a casual

× C an immaterial

× D a deliberate

While zoos and animal sanctuaries _____ protect and preserve the lives of endangered species, many wild-captured animals such as polar bears, tigers, cheetahs, and lions do not fare well in confinement. These animals are more likely to suffer from chronic captivity stress, which has negative implications for their long-term survival.

PREV. QUESTION NEXT QUESTION

5. Which choice completes the text with the most logical and precise word or phrase?

× A ostensibly

× B fortuitously

× C remarkably

× D despondently

The following is adapted from Arthur Conan Doyle's 1891 Sherlock Holmes short story "A Scandal in Bohemia." In this excerpt, the narrator, Dr. Watson, explains how Holmes views emotions in his work.

> Holmes was, I take it, the most perfect reasoning and observing machine that the world has seen, but he never spoke of the softer passions, save with a gibe and a sneer. They were admirable things for the observer—excellent for drawing the veil from men's motives and actions. But for the trained reasoner to admit such intrusions into his own delicate and finely adjusted temperament was to introduce a distracting factor which might throw a doubt upon all his mental results. Grit in a sensitive instrument, or a crack in one of his own high-power lenses, would not be more disturbing than a strong emotion in a nature such as his.

PREV. QUESTION NEXT QUESTION

6. Which choice best states the main purpose of the text?

× A To convince readers to control all their emotions in order to draw accurate logical conclusions about their situations

× B To characterize Holmes by comparing him to a scientific machine and showing how emotions would negatively impact such a machine

× C To express admiration for an attribute of Holmes that the narrator cannot find in himself but wishes to aspire to

× D To criticize the weakness of permitting emotion to impact mental processes that should be entirely rational and scientific

According to surveys conducted by Gallup, Americans' trust in institutions of higher learning fell sharply between 2015 and 2023. In 2023, only 36% of Americans expressed confidence in higher education compared to 57% in 2015 and 48% in 2018. The research suggests that the reasons for the decline differed between Republicans and Democrats: Republicans were concerned about university politicization while Democrats worried about the steep increases in education costs.

PREV. QUESTION NEXT QUESTION

7. Which choice best states the main idea of the text?

A. Between 2015 and 2023, trust in higher education has been steadily decreasing for both Republicans and Democrats.

B. Both Republications and Democrats believe that the cost of education must decrease in order to regain trust in colleges and universities.

C. Republicans mistrust universities because they believe these institutions are highly politicized, but they also believe education has become too expensive.

D. Trust in higher education has been decreasing for both Republicans and Democrats but their reasons for this decline vary.

The following is adapted from E.M. Forster's 1909 novella *The Machine Stops*, a dystopian story in which humans live in entirely artificial environments.

> Imagine, if you can, a small room, hexagonal in shape, like the cell of a bee. It is lighted neither by window nor by lamp, yet it is filled with a soft radiance. There are no apertures for ventilation, yet the air is fresh. There are no musical instruments, and yet, at this moment, this room is throbbing with melodious sounds. An armchair is in the center, by its side a reading-desk — that is all the furniture. And in the armchair there sits a swaddled lump of flesh — a woman, about five feet high, with a face as white as a fungus.

PREV. QUESTION NEXT QUESTION

8. Which choice best describes the function of the underlined sentence in the text as a whole?

✖ A It creates an opposition between the natural beauty of the larger setting and the ugliness of the woman.

✖ B It contributes to an understanding of the typical day for an ideal citizen within this fictitious world.

✖ C It dehumanizes the woman in order to make her and the world she lives in seem unattractive and artificial.

✖ D It enforces the idea that the people in this society have become morally and ethically corrupted.

The following text is from Horace Smith's 1817 poem "On a Stupendous Leg of Granite, Discovered Standing by Itself in the Deserts of Egypt, with the Inscription Inserted Below."

In Egypt's sandy silence, all alone,
Stands a gigantic Leg, which far off throws
The only shadow that the Desert knows.
"I am great Ozymandias," saith the stone,
"The King of kings: this mighty city shows
The wonders of my hand." The city's gone!
Naught but the leg remaining to disclose
The sight of that forgotten Babylon.

We wonder, and some hunter may express
Wonder like ours, when through the wilderness
Where London stood, holding the wolf in chase,
He met some fragment huge, and stops to guess
What wonderful, but unrecorded race
Once dwelt in that annihilated place.

PREV. QUESTION NEXT QUESTION

9. Which choice best states the main idea of the text?

× A Even great civilizations can be reduced to dust.

× B Mighty kings like Ozymandias do not always impact history.

× C Modern-day London will be destroyed like ancient Egypt was.

× D No one can truly know what happened in history.

COME BACK LATER

The Art of War is a book by Sun Tzu that was written in fifth century BCE. It is perhaps the most widely quoted military work in human history. One reason for this is likely due to adages that are applicable not only to generals but also to the general population: _____

PREV. QUESTION NEXT QUESTION

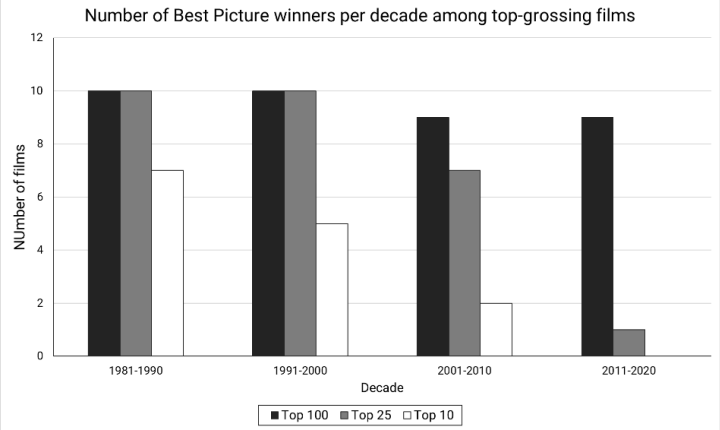

10. Which quotation from *The Art of War* most effectively illustrates the claim?

× A "If fighting is sure to result in victory, then you must fight, even though the ruler forbid it."

× B "No ruler should put troops into the field merely to gratify his own spleen."

× C "Maneuvering with an army is advantageous; with an undisciplined multitude, most dangerous."

× D "A leader leads by example not by force."

In the 2010s, a divide emerged between popular films and those considered artistic successes; movies that won Academy Awards for Best Picture were rarely widely watched by the broader viewing public. Cultural commentators are unsure of the reason for this phenomenon, but there is evidence for this shift. For example, _____

PREV. QUESTION NEXT QUESTION

11. Which choice most effectively uses data from the graph to complete the example?

× A each decade from 1981 to 2020 saw fewer Best Picture films in the top 100 grossing films than the decade preceding it.

× B 2001 to 2022 did not feature a single Best Picture winner among the 25 grossing films, unlike previous years.

× C each decade from 1981 to 2020 saw fewer Best Picture films in the top 10 grossing movies than the decade preceding it.

× D Best Picture winners have dominated the charts for the past 4 decades.

Lithium-ion batteries, which power many electric vehicles, create energy through the movement of lithium ions between the cathode and anode electrodes inside the battery: the greater the number of ions transferred, the higher the amount of generated energy. A significant drawback, however, lies in the batteries' manufacturing process, which uses mixtures of environmental toxins, but researchers at the Oak Ridge National Laboratory have designed an environmentally friendly alternative that they claim creates a superior product: batteries that maintain much higher energy levels than the ones produced by the old procedure.

PREV. QUESTION NEXT QUESTION

12. Which finding, if true, would most directly support the researchers' claim?

✖ A The new battery manufacturing process is adaptable to current production facilities and can replace the old system at little to no cost.

✖ B The batteries made with the new process have thicker electrodes that provide a more direct path of travel for the lithium ions.

✖ C The new process binds several dry powders together, then compacts them to increase particle contact, thus avoiding the toxic mixes of the old procedure.

✖ D The electrodes in batteries produced with the new process are stronger and more flexible than the old ones.

In 2018, Pierre Vanderhaeghen and his research team conducted a study to understand the factors behind the human brain's large size and rapid development compared to other species. Because new gene variations can emerge through duplication, Vanderhaeghen's team focused on human-specific genes that originated from such events. Among these genes were Notch genes, which play a crucial role in development. Furthermore, the team found that Notch2NL genes, a type of Notch gene, are unique to the human genome, suggesting that _____

PREV. QUESTION | NEXT QUESTION

13. Which choice most logically completes the text?

× A they likely contributed significantly in the enlargement and accelerated development of the human brain.

× B chimpanzees, the closest genetic relative to humans, likely have Notch2NL genes as well.

× C human brains are likely to continue developing at a rapid rate within the span of thousands of years.

× D all Notch genes have contributed to the rapid development of the human brain during human evolution.

Harvard psychologist Howard Gardner developed a theory commonly called "multiple intelligences," which asserts that intelligence is not a single aspect of our brains but several varied and entirely distinct mental capacities. However, research into the functioning of the brain has not found clear evidence to support this view at a biological level. Nonetheless, it has proven fruitful for educational theorists and pedagogical practitioners, which suggests that sometimes _____

PREV. QUESTION | NEXT QUESTION

14. Which choice most logically completes the text?

× A current technologies may not be advanced enough to prove a scientist's theory.

× B that which is scientifically verified is not always useful in application to education.

× C theorists are proven correct by personal experience rather than by scientific observation.

× D the practical applications of an unverified theory can outweigh the lack of concrete scientific evidence.

Could a certain species of butterfly adapt to changing climate conditions by adjusting its migratory patterns in response to shifting _____ what a team of biologists at the National Institute of Environmental Health Sciences sought to investigate through a study designed to track monarch butterflies' movements for over twenty years.

PREV. QUESTION NEXT QUESTION

15. Which choice completes the text so that it conforms to the conventions of Standard English?

× A temperatures? This is

× B temperatures. This is

× C temperatures: this is

× D temperatures, this is

Indigenous to India, the rusty-spotted cat (*Prionailurus rubiginosus*) is considered one of the world's smallest cat species. Although they were previously thought to prefer damp environments, recent studies _____ that they can thrive in dry habitats too. Despite their slight physique, rusty-spotted cats are efficient and ambitious hunters, capable of capturing prey larger than themselves.

PREV. QUESTION NEXT QUESTION

16. Which choice completes the text so that it conforms to the conventions of Standard English?

× A have suggested

× B had suggested

× C are suggesting

× D are being considered

Seattle, Washington, has earned its reputation as a perennially overcast city by virtue of its record-breaking streaks of days with rain. It is far from the rainiest city in the United _____ to the heavy rainfall that visits the east coast of the United States, the volume of rain in the east surpasses the drizzling that is more common in the northwest.

PREV. QUESTION | NEXT QUESTION

20. Which choice completes the text so that it conforms to the conventions of Standard English?

× A States; however, due

× B States, however; due

× C States, however, due

× D States however due

The last time Congress officially declared war was when it entered _____ the US has participated in multiple conflicts since then, including the Korean War, the Vietnam War, and the First and Second Iraq wars. Military engagements post World War II were conducted either under a Congressional "authorization of use of military force" or with no approval from Congress whatsoever.

PREV. QUESTION | NEXT QUESTION

21. Which choice completes the text so that it conforms to the conventions of Standard English?

- A World War II. Although
- B World War II; although
- C World War II, although
- D World War II, although,

"*Post hoc ergo propter hoc*" is a common logical fallacy that assumes an event is caused by what preceded it. Many superstitions are classic examples of this, such as one assuming that a black cat crossing the street is a harbinger of bad luck. _____ the "*cum hoc ergo propter hoc*" fallacy assumes causation between two things that happen simultaneously (for example, the assumption that a victorious sports game was brought about by the family heirloom worn during the match).

PREV. QUESTION | NEXT QUESTION

22. Which choice completes the text with the most logical transition?

- A For example,
- B Nevertheless,
- C Consequently,
- D Similarly,

There are two approaches to rid canines of heartworm disease: the “fast-kill method” and the “slow-kill” method. Because the fast-kill method requires strict exercise restriction for months at a time, some animal rescue advocates argue that the slow-kill method is more humane, as it eliminates the need for activity restriction. _____ the slow-kill method is not recommended by most veterinarians as it can result in increased likelihood for long-term damage to the dog’s heart and lungs.

PREV. QUESTION NEXT QUESTION

23. Which choice completes the text with the most logical transition?

× A Nevertheless,

× B Accordingly,

× C Furthermore,

× D Consequently,

Divergent evolution is the process by which population groups that were once a single species evolve and accumulate differences, forming new species. This evolutionary process may occur as a response to changes in abiotic factors, such as a change in environmental conditions or when a new ecological niche becomes available. _____ divergent evolution may occur in response to changes in biotic factors, such as increased or decreased pressure from competition or predation.

PREV. QUESTION NEXT QUESTION

24. Which choice completes the text with the most logical transition?

× A In other words,

× B Alternatively,

× C Consequently,

× D Despite that,

While researching a topic, a student has taken the following notes:

- The ginkgo tree, also known as *Ginkgo biloba*, is a tree native to China.
- The ginkgo is called a "living fossil" because it is the sole surviving member of an ancient order of trees called Ginkgoales which dates back more than 290 million years.
- Since the 14th century, ginkgo trees have been widely cultivated in Japan and Korea. Six ginkgo trees survived the 1945 atom bomb explosion in Hiroshima, Japan, during the Second World War.
- ginkgo leaves have a distinct fan-like shape with veins that radiate from a central point.
- Ginkgo seeds, also called ginkgo nuts, are commonly used in Chinese, Japanese, and Korean cuisine, while the leaves are often used to make an herbal tea.

PREV. QUESTION NEXT QUESTION

25. The student wants to highlight a relatively recent historical example of the resilience of the ginkgo tree. Which choice most effectively uses relevant information from the notes to accomplish this goal?

✖ A The ginkgo tree, also known as *Ginkgo biloba*, is called a "living fossil" because it is the sole surviving member of an ancient order of trees called Ginkgoales which dates back more than 290 million years.

✖ B In an impressive demonstration of the species' tenacity, six ginkgo trees survived the 1945 atom bomb explosion in Hiroshima, Japan during the Second World War.

✖ C Though the ginkgo tree is native to China, ginkgo trees have been widely cultivated in Japan and Korea since the 14th century.

✖ D Part of an ancient order of trees that dates back more than 290 million years, ginkgo seeds are commonly used in Chinese, Japanese, and Korean cuisine, while the leaves are often used to make an herbal tea.

notes:

- One of the largest art thefts in modern history occurred at The Isabella Stewart Gardner Museum in Boston, Massachusetts, on March 18, 1990.
- The stolen artworks were worth an estimated $500 million and included masterpieces by renowned artists such as Rembrandt Harmenszoon van Rijn and Johannes Vermeer, including his piece *The Concert*, which is considered one of the most valuable paintings in the world.
- Among the stolen artworks was a bronze *gu*, a vessel used for serving wine in ancient China that was worth only a few thousand dollars.
- The stolen artworks were cut out from their frames, leaving empty frames hanging on the museum walls, which still serve as a haunting reminder of the missing masterpieces and the unsolved crime.
- Despite extensive investigations by the Federal Bureau of Investigation to recover the stolen artworks, the case remains unsolved.
- As of 2017, The Gardner Museum offered a reward of $10 million for information leading to the recovery of the stolen pieces.

PREV. QUESTION NEXT QUESTION

26. The student wants to highlight the range in the value of the stolen artworks. Which choice most effectively uses relevant information from the notes to accomplish this goal?

× A Although The Gardner Museum offered a reward of $10 million for information leading to the recovery of the stolen pieces, the case remains unsolved.

× B During the theft at The Isabella Stewart Gardner Museum in 1990, thirteen artworks worth an estimated $500 million disappeared.

× C Among the stolen artworks was one of the most valuable paintings in the world and a bronze vessel valued at a few thousand dollars.

× D The empty frames from the stolen artworks still hang on the museum walls, which serves as a haunting reminder of the $500 million theft.

While researching a topic, a student has taken the following notes:

- Antipater of Sidon was a Greek author who lived in the second century BCE.
- He composed a list of the seven wonders of the ancient world, highlighting notable monuments and works of public architecture.
- Two sites from ancient Babylon, the Hanging Gardens and the Ishtar Gate, appeared on Antipater's list.
- Other lists include the Hanging Gardens but omit the Ishtar Gate in favor of monuments more directly inspired by ancient Greece.
- The Temple of Artemis at Ephesus, the Colossus of Rhodes, and the Statue of Zeus at Olympia were all products of Greek art.

PREV. QUESTION

27. The student wants to contrast Antipater's list of ancient wonders with other lists. Which choice most effectively uses relevant information from the notes to accomplish this goal?

× A While some lists of the wonders of the ancient world include two monuments from Babylon, others prioritize sites from ancient Greece.

× B A list composed by Antipater includes two of Babylon's cultural and architectural achievements: the Ishtar Gate and the Hanging Gardens.

× C Antipater's list includes both the Hanging Gardens and the Ishtar Gate, whereas some other observers only mentioned the Hanging Gardens when compiling their own lists.

× D Two of the seven wonders listed by Antipater were located in Babylon, while other cited wonders, such as the Statue of Zeus at Olympia, were products of ancient Greek culture.

MODULE 2 R&W
(HARDER)

In 2021, the International Consortium of Investigative Journalists began an investigation of the New York City Metropolitan Museum of Art acquisition practices, raising questions about the problematic origin of much of its existing collections. New revelations regarding the museum's relationship with convicted antiquities dealer Subhash Kapoor have further _____ the institution's reputation.

NEXT QUESTION

1. Which choice completes the text with the most logical and precise word or phrase?

- A buoyed
- B clarified
- C marred
- D parodied

One of the most famous criminals in modern history was Charles Ponzi who was notorious for his _____, wrongly assuming himself to be immune to legal investigation so long as he treated his investors generously and generated positive press for his business.

PREV. QUESTION NEXT QUESTION

2. Which choice completes the text with the most logical and precise word or phrase?

- A nihilism
- B acumen
- C temerity
- D diffidence

According to the Henley Passport Index, as of 2023, Singapore's passport is the most powerful in the world. This means Singaporeans can travel visa-free to more nations than anyone else. On the other hand, the US has dropped to eighth place, which could _____ the country's decreased worldwide influence.

PREV. QUESTION NEXT QUESTION

× B exhaust

× C portend

× D forestall

In 2021, Israeli archeologists unearthed the ruins of a large basilica built in the 1st century CE by Herod the Great. Destroyed by an earthquake in the fourth century, the basilica was nevertheless an architectural wonder of its time; Israeli officials hope to _____ the original building to its former glory so that visitors can enjoy the structure as it stood 2,000 years ago.

PREV. QUESTION NEXT QUESTION

4. Which choice completes the text with the most logical and precise word or phrase?

× A reform

× B reserve

× C replicate

× D restore

Recent studies have documented that the presence of sea otters contributes to ecological resilience within local habitats. For example, researchers recognized improved genetic diversity in eelgrass when otters foraged for food in eelgrass beds; thus, the otters' presence gave the grass an increased resistance to ecological shifts. For environmentalists concerned with ecosystem preservation, this provides an additional _____ to restore the otters to previously inhabited areas.

PREV. QUESTION NEXT QUESTION

5. Which choice completes the text with the most logical and precise word or phrase?

× A barrier

× B edict

× C quandary

× D impetus

A team of researchers at the Population Research Health Institute found that underconsumption of fruits, vegetables, legumes, nuts, fish, and whole-fat dairy products led to a higher risk of developing cardiovascular disease (CVD). This was consistent across regions and cultures. To lower the risk of CVD, researchers recommended consuming at least two daily servings of fruit and vegetables along with a weekly diet of three servings of legumes, seven servings of nuts, two servings of fish, and fourteen servings of dairy products.

PREV. QUESTION NEXT QUESTION

6. Which choice best states the function of the underlined portion in the text as a whole?

× A It describes the impact of malnutrition across different regions and cultures.

× B It underscores how poor diets have been an issue for an immeasurably long time.

× C It suggests that inadequate diets are a widespread issue.

× D It emphasizes why consuming certain food groups is important.

The following text comes from a 10th-century account of an Arab ambassador to Constantinople titled “An Embassy from Baghdad to the Emperor Basil II.”

> The Byzantine Sovereign said: "You have come on a reprehensible errand; your envoy came and procured our consent to certain terms, which included the restoring of the fortresses taken during the revolt; you are now asking to have other fortresses which were taken by my predecessors. Either consent to what was originally stipulated or go in peace." I replied: "But we agreed on nothing, for, as for the document we brought, you deprived us under its terms of half our territory; how can we admit such a thing against ourselves?" Here the Chamberlain interposed, saying: "This envoy is skilled in controversy and can make up a fine story: death is better for us than submission to these terms: let him return to his master." The Sovereign then rose, and I withdrew.

PREV. QUESTION NEXT QUESTION

7. According to the text, what was the result of the negotiations between the Byzantine emperor and the ambassador?

- ✖ A The emperor had come to an agreement with the ambassador before the chamberlain spoiled the negotiations.
- ✖ B The emperor was offended by the chamberlain’s tone and approach, so he sent him away.
- ✖ C The emperor and ambassador agreed that certain fortresses needed to be returned to their original owners.
- ✖ D The emperor felt the ambassador did not honor a previous agreement, so he ended the negotiations.

The following text comes from the first-century work *A Record of Buddhistic Kingdoms* by Fa-Hien.

> After travelling for seventeen days, the pilgrims reached the kingdom of Shen-shen, a country rugged and hilly, with a thin and barren soil. The clothes of the common people are coarse, and like those worn in our land of Han, some wearing felt and others coarse serge or cloth of hair; this was the only difference seen among them. The king professed our Law, and there might be in the country more than four thousand monks, who were all students of the hinayana. The common people of this and other kingdoms in that region, as well as the sramans, all practise the rules of India, only that the latter do so more exactly, and the former more loosely.

PREV. QUESTION NEXT QUESTION

8. According to the text, how were the sramans different from the rank-and-file citizens of Shen-shen?

× A The sramans were foreigners while the common citizens were natives.

× B The common folk were students of hinayan, but the sramans followed a different faith.

× C The common folk wore clothes made of felt while the sramans wore garments of hair.

× D The sramans followed India's laws more carefully than the regular citizens.

The following text is from Carl Schurz's 1908 book *Reminiscences*.

> We tore down the stair, into the street, to the market square, the accustomed meeting place for all the student societies after their midday dinner. Although it was still forenoon, the market was already crowded with young men talking excitedly. There was no shouting, no noise, only agitated conversation. What did we want there? This probably no one knew. But since the French had driven away Louis Philippe and proclaimed the republic, something of course must happen here, too. Some of the students had brought their rapiers along, as if it were necessary to make an attack or to defend themselves.

PREV. QUESTION NEXT QUESTION

9. According to the text, what were the students discussing?

× A They were discussing how little they knew of the political situation.

× B They were discussing how to defend themselves from an impending attack.

× C They were discussing the potential impact of the events in France on their locality.

× D They were discussing how their meeting place may have to change given the situation.

The domestication hypothesis suggests that dogs' social and cognitive abilities evolved as a result of physical proximity to humans. These abilities span from using eye contact to create social bonds to the ability to follow pointing gestures. A student's paper posits that this same domestication process is actively occurring in animals that live near suburban areas.

PREV. QUESTION | NEXT QUESTION

10. Which finding, if true, would most directly support the student's argument?

✖ A Fossil records indicate that animals inhabited the areas that are currently considered suburban in far greater numbers than they do now.

✖ B Statistical evidence from the Fish and Wildlife Service shows that fewer animals are hunted as a result of greater evasive success with hunters.

✖ C Several news agencies report that deer in suburban areas are "staring" at passersby far more than rural deer.

✖ D According to the Journal of Veterinary Science, dogs that live in suburban areas tend to have more social connections than other dogs.

Functional MRI is a neuroimaging technique that measures the magnetic properties of hemoglobin in blood to determine what parts of the brain are supplied with more oxygen for respiration during an experiment. This indication of brain activity is called a blood-oxygen-level-dependent (BOLD) response. Patients meeting the clinical threshold for obesity tend to have a much higher BOLD response to food than patients that do not meet the clinical threshold. A student's paper posits that neurofeedback can help train the brain to mitigate this heightened response to food and food-related content and can promote neurological healing.

PREV. QUESTION NEXT QUESTION

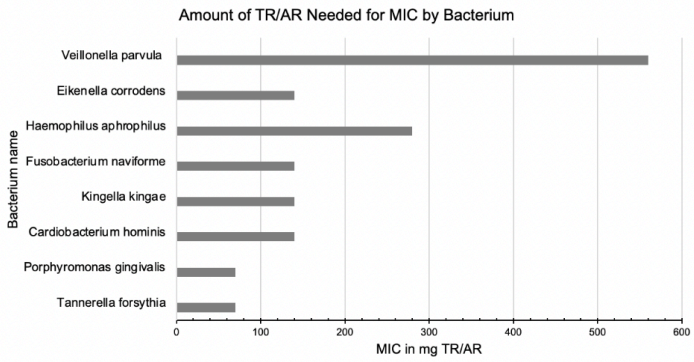

11. Which finding, if true, would most directly support the student's argument?

✖ A After several months of neurofeedback therapy, individuals exhibit a reduced BOLD response to food-related stimuli compared to those who did not receive the therapy.

✖ B Obese individuals are more likely to exhibit an elevated BOLD response to food-related content after a meal compared to non-obese individuals.

✖ C Neurofeedback has been shown to be an important tool in remedying behavioral habits that are risk factors for obesity but shows little to no evidence of neurological changes post-intervention.

✖ D Recent studies suggest that individuals who have received neurofeedback therapy but are not clinically obese show an increased BOLD response to food stimuli.

Isothiocyanates (ITCs) are natural compounds produced by plants such as nasturtium and horseradish, which are known for their ability to inhibit bacterial formation and reduce inflammation. A commercially available treatment for acute inflammation contains 280 mg/ml of a mixture of nasturtium and horseradish, abbreviated as TR/AR. Vanessa Eichel of the University of Freiberg and colleagues conducted a study to expose bacteria to ITCs from TR/AR and calculated the minimal inhibitory concentration (MIC) of ITC required to hinder bacterial growth in disease-causing bacteria. They noted that in most cases, the amount of plant-derived ITCs needed to prevent bacterial proliferation was lower than the amount present in the commercial mixture.

PREV. QUESTION NEXT QUESTION

12. Which choice best describes data from the graph that support the researchers' observation?

✖ A *Haemophilus aphrophilus* requires the same amount of plant-derived ITCs to inhibit proliferation as the commercially available mixture that is used to treat acute inflammation.

✖ B Less TR/AR is required for *Cardiobacterium hominis*, *Fusobacterium naviforme*, and *Eikenella corrodens* to reach a level that prevents bacterial growth compared to *Haemophilus aphrophilus*.

✖ C Among the studied bacteria, *Veillonella parvula* is the most resistant to TR/AR, requiring nearly two doses of the clinical treatment to reach MIC.

✖ D Only one of the bacterium studied is more resistant to the plant-derived ITCs than *Haemophilus aphrophilus*, which contains the same amount of TR/AR as the commercially available mixture.

Though some consumers find paying a state-mandated deposit with all purchases of glass, plastic, or aluminum beverages bothersome, there is evidence that such programs have a strong impact on recycling rates. The Container Recycling Institute estimates that a mandate of just 10 cents on every container could raise the recycling level to 90 percent, whereas it tends to be 30 to 50 percent in regions with no deposit. Furthermore, when containers are returned for a refund, they are better sorted and less likely to be lost or destroyed in the recycling process. Thus, _____

PREV. QUESTION NEXT QUESTION

13. Which choice most logically completes the text?

✖ A deposit programs for beverage containers will fail if consumers find paying for the deposits burdensome, which most do.

✖ B even though consumers may be inconvenienced, deposit programs can be an effective tool to increase the recycling of beverage containers.

✖ C deposit programs for beverage containers are the best way to guarantee that all containers will be recycled.

✖ D starting a deposit program will raise the popularity of recycling by 60% in any region where there was previously no such program.

Researchers Valentina Marinescu and Ecaterina Balica have studied the popularity of Korean pop music (K-Pop) in Romania. Despite the lack of contact or cultural connection between the two countries, Romania has many well-organized K-Pop fan clubs. Members of these clubs connect online and in person to learn the Korean language, enjoy Korean cuisine, and listen to K-Pop music, suggesting that _____

PREV. QUESTION NEXT QUESTION

14. Which choice most logically completes the text?

× A the Romanian K-Pop fandom is a crude form of cultural appropriation.

× B the communal aspect of K-Pop clubs is more attractive than the music itself.

× C K-Pop's global appeal transcends geographical and cultural boundaries.

× D K-Pop fulfills a visceral need that local art forms cannot fill.

The Chidon Ha-Tanach is a global trivia competition designed for middle and high school students from the Jewish community. It focuses on testing their knowledge of the Tanach, the Hebrew scriptures. The finals are televised in Jerusalem, Israel's capital, and the final question is asked by the Israeli prime minister. In 2010, the prime minister's son competed in the Chidon Ha-Tanach and placed third. Thus, _____

While researching a topic, a student has taken the following notes:

- Bruges, a city founded in the 12th century in northwestern Belgium, is known for its medieval architecture and picturesque canals.
- Since 2000, Bruges's city center has been a UNESCO (United Nations Educational, Scientific, and Cultural Organization) World Heritage Site.
- Bruges was occupied by German forces during World War I and World War II but suffered virtually no destruction. Today, it is one of the best-preserved medieval towns in Europe.
- Over eight million tourists visit Bruges each year.
- Bruges is commercially important due to its port, Zeebrugge, which handles approximately 45 million tons of cargo annually.

PREV. QUESTION NEXT QUESTION

25. The student wants to emphasize Bruges's longevity as a preserved medieval town. Which choice most effectively uses relevant information from the notes to accomplish this goal?

✖ A Bruges' city center was spared destruction in both World War I and World War II.

✖ B Bruges' city center, still intact, dates back to the 12th century.

✖ C Bruges' city center, known for its medieval architecture, has been a UNESCO World Heritage Site since 2000.

✖ D Bruges is of economic importance due to its port at Zeebrugge, which serves as a hub for commercial activities.

While researching a topic, a student has taken the following notes:

- *The Great Wave off Kanagawa* is a woodblock print created in 1831 by Japanse artist Katsushika Hokusai.
- *The Great Wave off Kanagawa* reportedly inspired French composer Claude Debussy's symphony *La Mer* (The Sea) in 1905 and Austrian poet Rainer Maria Rilke's "Der Berg" (The Mountain) in 1907.
- *The Great Wave off Kanagawa* is an example of *ukiyo-e*, a Japanese printmaking technique that dates to the 17th century.
- *The Great Wave off Kanagawa* depicts a giant wave that suggests tsunami-like conditions off the shore of Mount Fuji, the highest mountain in Japan.
- The Japanese government will release a redesign of the 1000-yen bill in 2024 that will feature *The Great Wave off Kanagawa* on one side of the currency.
- *The Great Wave off Kanagawa* features a sense of depth between the foreground and the background of the print, reflecting Western influence that emerged via Dutch trade in Japan in the 18th century.

PREV. QUESTION NEXT QUESTION

26. The student wants to highlight the international influence of *The Great Wave off Kanagawa*. Which choice most effectively use relevant information from the notes to accomplish this goal?

✖ A More than 190 years after the printing of *The Great Wave off Kanagawa*, the Japanese government will release a new bill that features *The Great Wave off Kanagawa*.

✖ B *The Great Wave off Kanagawa* by Japanese artist Katsushika Hokusai is an 1831 woodblock print that represents *ukiyo-e*, a 17th-century Japanese printmaking technique.

✖ C Though Japanese artist Katsushika Hokusai created *The Great Wave off Kanagawa* in 1831, it inspired artists such as French composer Claude Debussy and Austrian poet Rainer Maria Rilke decades later.

✖ D Though Katsushika Hokusai was Japanese, *The Great Wave off Kanagawa* contains elements that reflect Western influences.

While researching a topic, a student has taken the following notes:

- Wuyi teas are a category of Chinese black and oolong teas grown in and around the Wuyi Mountains in China.
- The Wuyi Mountains, a UNESCO World Heritage Site since 1999, provide an ideal environment for cultivating these teas.
- Wuyi teas are known for their complex and robust flavors with notes of charcoal, caramel, and fresh herbs.
- The production of Wuyi teas involves plucking, withering, bruising, drying, and multiple roastings to enhance flavors.
- One of the most famous varieties of Wuyi tea is the most expensive tea in the world: Da Hong Pao, which costs over one million dollars per kilogram.

PREV. QUESTION NEXT QUESTION

27. The student wants to describe the origins of Wuyi teas and a reason for their unique flavor. Which choice most effectively use relevant information from the notes to accomplish this goal?

× A Wuyi teas, cultivated in the Wuyi mountains, have complex flavors that originate from an intricate production process that includes multiple roasts.

× B The Wuyi Mountains provide an ideal environment for growing Wuyi teas and embedding those teas with distinct flavors.

× C Da Hong Pao is a famous kind of Wuyi tea and despite its high cost, it has the same distinctive flavor notes as other Wuyi teas.

× D Wuyi teas, which are grown in the Wuyi Mountains of China, combine many unique flavors, including charcoal and caramel.
