INNOVATOR TEST 8

READING AND WRITING MODULE 1

According to researchers François de Médicis and Steven Huebner, Claude Debussy's influence on modern music is _____. Even to this day, many people are familiar with his 1905 piece "Clair de Lune," which has been featured in movies and TikTok videos alike due to its poignant melancholy tones.

NEXT QUESTION

1. Which choice completes the text with the most logical and precise word or phrase?

- A questionable
- B exaggerated
- C undeniable
- D unjustified

A recent study suggests that millennials, as well as members of Generation X and Generation Z, prioritize flexible work schedules and the opportunity for telework in their professional pursuits, rather than the more traditional 9-to-5 schedule in a brick-and-mortar building. Indeed, in the last decade, many companies have shifted to a virtual office model, challenging the previous generation's idealization of the coveted corner office as the _____ of professional success.

2. Which choice completes the text with the most logical and precise word or phrase?

- A antithesis
- B pinnacle
- C impediment
- D cornerstone

COME BACK LATER

In the spring of 2022, NASA released a “space song” composed of the recorded soundwaves of a vast black hole located approximately 200 million light-years from Earth. The black hole is at the center of the Perseus galaxy cluster, _____ assembly of galaxies spanning a staggering 11 million light-years, surrounded by clouds of hot gas. Scientists were able to extract and modify sound waves from the gaseous clouds surrounding the massive cluster and modify them to make the sounds audible to human ears.

3. Which choice completes the text with the most logical and precise word or phrase?

× A a banal

× B an enigmatic

× C an expansive

× D a congenial

A new study published by Chelsea Martin of Loma Linda University School of Medicine suggests rattlesnakes are more _____ creatures than commonly believed. The study found evidence of social buffering among the snakes, characterized by the ability to draw emotional support from a peer.

PREV. QUESTION NEXT QUESTION

4. Which choice completes the text with the most logical and precise word or phrase?

× A gregarious

× B solicitous

× C innocuous

× D expressive

The following text is from Henry Howard's 16th-century poem "The Things That Cause a Quiet Life."

My friend, the things that do attain
The happy life be these, I find:
The riches left, not got with pain,
The fruitful ground; the quiet mind;

The equal friend; no grudge, no strife;
No charge of rule nor governance;
Without disease the healthy life;
The household of continuance;

The mean diet, no dainty fare;
True wisdom joined with simpleness;
The night discharged of all care,
Where wine the wit may not oppress;

The faithful wife, without debate;
Such sleeps as may beguile the night:
Content thyself with thine estate,
Neither wish death, nor fear his might.

PREV. QUESTION NEXT QUESTION

5. Which choice best states the main purpose of the text?

× A To describe the necessary components of contentment

× B To explain what kind of life strong friendships bring

× C To recount the author's sharing of his harvest with friends and family

× D To express why money can't buy happiness

The following text comes from the 1789 autobiography of Olaudah Equiano, *The Interesting Narrative of the Life of Olaudah Equiano*.

My father was one of those elders or chiefs I have spoken of, and was styled Embrenche; a term, as I remember, importing the highest distinction, and signifying in our language a mark of grandeur. This mark is conferred on the person entitled to it, by cutting the skin across at the top of the forehead, and drawing it down to the eye-brows; and while it is in this situation applying a warm hand, and rubbing it until it shrinks up into a thick weal across the lower part of the forehead. Most of the judges and senators were thus marked; my father had long born it: I had seen it conferred on one of my brothers, and I was also destined to receive it by my parents.

PREV. QUESTION NEXT QUESTION

6. Which choice best states the main purpose of the text?

× A To celebrate the political career of the author's father, who received a highly respected mark of distinction

× B To provide a detailed account of the Embrenche ceremony, including how it is performed

× C To express the author's apprehension about receiving the mark, which would leave a permanent scar

× D To illustrate the narrator's familial connection to a cultural practice and its significance

Text 1

Hanno the Navigator, a Carthaginian sailor and explorer, is credited with being one of the first Mediterranean explorers to sail down the west coast of Africa, along with a purported 60 ships and 30,000 men. His objective was to strengthen colonies and find new trade opportunities. While the results of his expedition remain uncertain, the surviving record claims that he encountered multiple indigenous cultures and had run-ins with unfamiliar wildlife his translators called "gorillas."

Text 2

Understanding Classical Age figures like Hanno the Navigator is challenging. Though evidence suggests he existed, the sole surviving record of his African voyage is a single temple carving, translated nearly a millennium later. Moreover, this record presents logical contradictions: how did the translators know local wildlife names if they couldn't understand the languages? Until more records emerge, Hanno and his contemporaries will remain enigmatic, almost mythical figures.

PREV. QUESTION NEXT QUESTION

7. Based on the texts, what would the author of Text 2 likely say about Text 1's description of Hanno's voyage?

× A It is likely accurate, given that the surviving record of the expedition came from a primary source.

× B It is questionable, considering that more evidence is needed to substantiate the initial records.

× C It is a misinterpretation of the alleged evidence, as it cannot be confirmed that the surviving record is about Hanno the Navigator.

× D It is factual in the sense that Hanno was not only an explorer but also a Carthaginian representative to its colonies.

The following text is from the 1st-century work *On Medicine* by Cornelius Celsus.

> A man in health, who is both vigorous and his own master, should be under no obligatory rules, and have no need for a medical attendant. His kind of life should afford him variety; he should be now in the country, now in town, and more often about the farm; he should sail, hunt, rest sometimes, but more often take exercise; for whilst inaction weakens the body, work strengthens it; the former brings on premature old age, the latter prolongs youth.

PREV. QUESTION NEXT QUESTION

8. Which choice best states the main idea of the text?

× A Farmers need less medical care than other professions.

× B An active lifestyle brings considerable health benefits.

× C A diverse life is also the most exciting one.

× D One should engage in exercise in one's youth.

The following is adapted from Benjamin Franklin's 1793 autobiography.

It was about this time I conceived the bold and arduous project of arriving at moral perfection. I wished to live without committing any fault at any time; I would conquer all that either natural inclination, custom, or company might lead me into. As I thought I knew what was right and wrong, I did not see why I might not always do the one and avoid the other. But I soon found I had undertaken a task of more difficulty than I had imagined. While my care was employed in guarding against one fault, I was often surprised by another; habit took the advantage of inattention; inclination was sometimes too strong for reason.

PREV. QUESTION NEXT QUESTION

9. Which choice best states the main idea of the text?

× A Achieving moral perfection is impossible for any human due to a lack of knowledge about what is truly right and wrong.

× B The wish to live a morally perfect life is foolish because of Franklin's bad habits and selfish desires that are too strong to overcome.

× C Moral perfection is harder to attain than Franklin assumed due to challenges posed by habits and desires.

× D The only way to achieve moral perfection for a human being is to cease participating in social life because company corrupts character.

African slaves were not only sold to colonies in North America but also to Indian kingdoms. Southeast Asian rulers sought these slaves primarily to serve in their armies, and the constant conflict between Indian states generated endless demand. Unlike their North American counterparts who were relegated to plantation work, African-Indian slaves could rise to high stations through their military service. They often served as advisors and administrators and, in a few cases, even seized the throne for themselves; the state of Bengal, for example, was ruled by several sultans who were former slaves of African ancestry.

PREV. QUESTION NEXT QUESTION

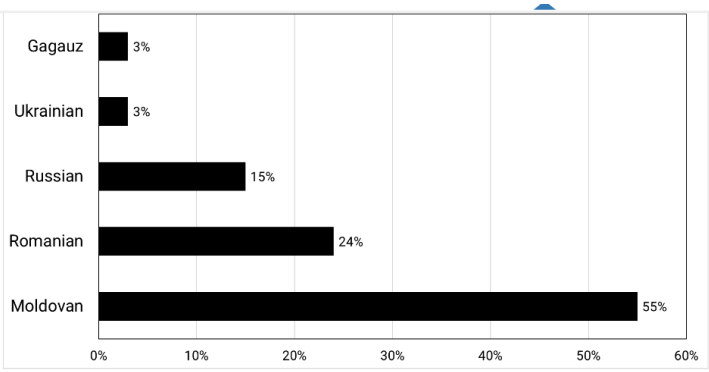

10. Which choice best states the main idea of the text?

✖ A The Indian kingdom of Bengal had many rulers of African heritage who were former slaves.

✖ B African-Indian slaves had opportunities to gain positions of power that were not available to other African slaves.

✖ C Indian kingdoms were as actively involved in the African slave trade as European countries were.

✖ D African-Indian slaves that rose to positions of power continued to use slaves to serve in their armies.

In the Eastern European country of Moldova, a debate rages over whether the official language is Moldovan or Romanian. While linguists concur the two are like American English and British English—dialects of the same language—the issue stems from the nation's history: Moldova alternated between Russian and Romanian rule before declaring independence in 1992. Under Russian control, the language was written in Cyrillic, the Russian alphabet, and referred to as Moldovan. Romanian, however, is written in the Latin alphabet, similar to English, Spanish, and other Western European languages. Upon its independence, Moldova opted to use the Latin alphabet, but whether the language should be called Moldovan or Romanian remains divisive, _____.

PREV. QUESTION NEXT QUESTION

11. Which choice most effectively uses data from the table to complete the statement?

✖ A with several ethnic minorities claiming neither Romanian nor Moldovan as their own.

✖ B with 15% of Moldovans identifying Russian as their native language and 3% as Ukrainian.

✖ C with 24% confirming their first language is Romanian compared to 3% for Gagauz.

✖ D with 55% referring to their mother tongue as Moldovan and 24% as Romanian.

WORLD WINE PRODUCTION AND CONSUMPTION

Country	Annual production in million hectoliters	Annual consumption per capita
Italy	44.5	46.6
Spain	35.0	19.8
France	34.2	46.0
United States	24.1	11.3
Australia	14.2	27.8
Chile	13.4	9.8
Argentina	12.5	27.6
Portugal	6.5	51.9

Worldwide wine production experienced significant growth in the early 2000s, with various countries establishing themselves as major producers. Regions like Italy, Spain, France, and the United States dominated the global wine market while emerging players like Argentina, Chile, and Australia made substantial strides. Surprisingly, the highest-producing wine regions of the world in the early 2000s were not always the highest-consuming ones. For example, _____

PREV. QUESTION NEXT QUESTION

12. Which choice most effectively uses data from the table to complete the example?

× A Australia produced 14 million hectoliters of wine annually, but Italy consumed a whopping 46.6 liters per capita.

× B France produced a little over 34 million hectoliters of wine, but the United States consumed significantly less: only 11.3 liters of wine per capita.

× C Italy produced 44.5 million hectoliters of wine, but Portugal consumed more wine per capita: nearly 52 liters.

× D Chile produced almost 10 million hectoliters liters of wine, but Argentina consumed almost 13 liters per capita.

Plutarch's Lives is a second-century anthology of biographies written by Plutarch. In the preface, he explains that his work focuses on his subjects' personalities rather than accomplishments: _____

PREV. QUESTION NEXT QUESTION

13. Which quotation from *Plutarch's Lives* most effectively illustrates the claim?

× A "I shall make no other preface than to beg the reader, if he finds any famous exploits recorded imperfectly, and with large excisions, not to regard this as a fault."

× B "However, in spite of these discrepancies, we will endeavor, by following the least inconsistent accounts and the best-known authorities, to write the history of his life."

× C "It is my duty to dwell especially upon those actions which reveal the workings of my heroes' minds, and from these to construct the portraits of their respective lives."

× D "That slight droop of his head towards the left, and that keen glance of his eyes which formed his chief characteristics were afterwards imitated by his friends and successors."

Among alternative energy sources, there is not yet an ideal solution to reducing the use of fossil fuels, even though many promising possibilities continue to be developed. However, one concern that many overlook in evaluating these energy sources is the environmental impact of establishing and maintaining these technologies to harness energy to meet the population's needs. For example, hydroelectric dams promise a nearly infinitely renewable source in using moving water, but building dams and the infrastructure needed to use the energy can have a deleterious effect on the ecology of rivers while also requiring extensive use of fossil fuels. Thus, _____

PREV. QUESTION NEXT QUESTION

14. Which choice most logically completes the text?

× A there is no reason to continue to pursue alternative energy sources since they are only slightly better than fossil fuels.

× B such impacts must be considered in choosing how to develop these energy technologies in order to minimize environmental degradation.

× C hydroelectric dam projects should be abandoned to pursue other alternative energy sources such as wind and solar power.

× D the environmental impact of alternative energies is often worse than that of fossil fuels.

The five-factor model is a widely accepted framework in psychology that categorizes personality traits into five dimensions: extraversion, neuroticism, conscientiousness, agreeableness, and openness to experience. Using the five-factor model to examine how the personalities of killer whales (*Orcinus orca*) adapt in captivity, _____

PREV. QUESTION NEXT QUESTION

15. Which choice completes the text so that it conforms to the conventions of Standard English?

× A researcher Javier Almunia determined that the animals held in captivity were more likely to exhibit higher degrees of extraverted, conscientious, and agreeable behavior compared to their wild counterparts.

× B animals held in captivity were more likely to exhibit higher degrees of extraverted, conscientious, and agreeable behavior compared to their wild counterparts, as determined by researcher Javier Almunia.

× C the study conducted by researcher Javier Almunia determined that the animals held in captivity were more likely to exhibit higher degrees of extraverted, conscientious, and agreeable behavior compared to their wild counterparts.

× D animals held in captivity, according to researcher Javior Almunia, were more likely to exhibit higher degrees of extraverted, conscientious, and agreeable behavior compared to their wild counterparts.

Certain plants, such as *Clematis alpina*, have twining stems that can wrap _____ around narrow structures or posts. These leaf stems, called petioles, become much thicker and sturdier in structure once they affix to a support. In fact, one experiment led by Sandrine Isnard found that a twining plant could withstand the weight of up to 600 grams of water before breaking.

PREV. QUESTION NEXT QUESTION

16. Which choice completes the text so that it conforms to the conventions of Standard English?

× A it

× B they

× C itself

× D themselves

Researcher Igor Pantic reviewed studies within the past ten years focusing on the link between social media use and mental wellness. Pantic's observations suggest that the studies available do not provide conclusive evidence of a correlation between frequent social media use and mental _____ do many of these studies account for the external factors that may influence this alleged correlation.

PREV. QUESTION NEXT QUESTION

17. Which choice completes the text so that it conforms to the conventions of Standard English?

× A illness nor

× B illness, nor

× C illness

× D illness,

Bioethics, as a formal field of study, at times defies easy classification within university departments. Already an area that would naturally be of interest to practicing doctors (who would flock to medical schools) and genomicists (who would more likely perform _____ it is also the province of humanist scholars, who trace some tenets of bioethical thought to the Greek philosopher Aristotle.

× A Similarly,

× B Meanwhile,

× C Actually,

× D Consequently,

Ai Weiwei is a contemporary artist and social activist who has received international recognition for blending traditional Chinese art forms with avant-garde concepts and ordinary materials. _____ his political commentary has resulted in censorship of his work as well as Chinese government surveillance.

PREV. QUESTION NEXT QUESTION

23. Which choice completes the text with the most logical transition?

× A For example,

× B Nevertheless,

× C Accordingly,

× D For this reason,

While researching a topic, a student has taken the following notes:

- Assateague Island is a 37-mile-long barrier island off the Atlantic coast of Maryland and Virginia.
- Assateague Island is home to two large wild horse populations known as the Assateague horse or the Chincoteague Pony, depending on whether the horses live on the Maryland side of the island or the Virginia side.
- More than 345 species of birds inhabit Assateague Island, including the piping plover, a near-threatened species of shorebird.
- Assateague Island is managed by the National Park Service, Maryland State Parks, Chincoteague Volunteer Fire Department, and the United States Fish and Wildlife Service.
- The section of the island north of the Maryland-Virginia state line is known as The Assateague Island National Seashore, established in 1965 to preserve the environment on the island and its surrounding waters.

PREV. QUESTION NEXT QUESTION

24. The student wants to describe the distinctive characteristics of Assateague Island. Which choice best accomplishes this goal?

× A Assateague Island is a 37-mile-long barrier island that is home to wild horse populations and more than 345 bird species.

× B The Assateague Island National Seashore protects the section of the island north of the Maryland-Virginia state line.

× C The horse species located in Assateague Island are alternately known as the Assateague horses or the Chincoteague Ponies, depending on whether the horses live on the Maryland side of the island or the Virginia side.

× D Without organizations such as the National Park Service and the Maryland State Parks, the many animal species resident to Assateague Island would likely be endangered.

While researching a topic, a student has taken the following notes:

- Joy Harjo, a member of the Mvskoke/Creek Nation, is a poet and author who has written ten poetry collections, three children's books, and two memoirs.
- Harjo has received numerous accolades, including the title of US Poet Laureate in 2019, becoming the first Native American to hold this position.
- Each year, the Librarian of Congress appoints the US poet laureate, who presents a reading and a lecture at the Library of Congress, usually spearheading a community-oriented poetry project of national significance.
- Harjo is also a musician and has released six albums, winning a Native American Music Award (NAMA) in 2008 for Best Female Artist of the Year for her album *Winding Through the Milky Way*.

PREV. QUESTION NEXT QUESTION

25. The student wants to emphasize how Harjo's contributions through multiple forms of artistic expression have received recognition. Which choice most effectively uses relevant information from the notes to accomplish this goal?

× A In addition to being an author, Harjo is also a musician who has released six albums to date, including *Winding Through the Milky Way*.

× B Harjo is a writer from the Mvskoke/Creek Nation and was awarded the honor of US Poet Laureate in 2019, the first Native American to be appointed to this position.

× C In 2019, Joy Harjo became the first Native American selected as the US Poet Laureate by the Librarian of Congress; she then presented a reading and lecture at the Library of Congress.

× D Harjo has written and composed poetry collections, children's books, memoirs, and music albums, earning her accolades such as US Poet Laureate and a NAMA.

While researching a topic, a student has taken the following notes:

- Nuclear power supplies 10 percent of the world's electricity and 20 percent of US electricity.
- Nuclear reactors do not generate air pollution or carbon dioxide during operation.
- Uranium ore is the primary fuel for nuclear reactors; mining uranium ore can take a considerable amount of fossil fuel energy.
- Radioactive waste is a byproduct of nuclear power generation; waste with high levels of radioactivity can take thousands of years to break down.
- The US Energy and Information Administration (EIA) states that most radioactive waste produced by plants has a low level of radioactivity.
- According to the Department of Energy, nuclear reactors in the US create more than 2,000 metric tons of radioactive waste annually.

PREV. QUESTION NEXT QUESTION

26. The student wants to argue that the repercussions of nuclear energy outweigh its advantages. Which choice most effectively uses relevant information from the notes to accomplish this goal?

× A While nuclear power produces lower emissions compared to fossil fuels, it takes a lot of energy to turn uranium into a fuel source, and the resulting radioactive waste from nuclear power can take years to break down.

× B Despite its nuclear waste leftovers, nuclear power generates 20 percent of US electricity and 10 percent of electricity worldwide while creating lower emissions compared to fossil fuels.

× C Despite the relatively low level of radioactivity in the waste produced by nuclear plants, the US still generates over 2,000 metric tons of such waste annually, while radioactive decay can last for thousands of years.

× D Uranium ore, the main fuel source for nuclear reactors, requires a lot of energy in the production process, which often involves fossil fuels, thus negating any claim of the benefits of using nuclear energy.

While researching a topic, a student has taken the following notes:

- Alexei Stakhanov was born in 1906 and worked as a miner in the Donbass region of Russia.
- He developed new methods to increase the output of the mine where he was stationed in the 1930s.
- Stakhanov encouraged miners to use rock drills instead of pickaxes for expediency.
- To improve efficiency, Stakhanov promoted the use of four-miner teams, with each miner focusing on a single specialized task.
- Stakhanov appeared on the cover of *TIME* magazine in 1935.
- The word "Stakhanovite" is occasionally used today to refer to an employee who puts in long hours and seems to enjoy continuous hard work.

PREV. QUESTION

27. The student wants to address a possible misconception about Stakhanov. Which choice most effectively uses relevant information from the notes to accomplish this goal?

(A) Stakhanov, whose name evokes nonstop hard work today, was actually an innovator in labor-saving methods.

(B) To promote increased output, Stakhanov divided miners into teams, with each miner taking on a specialized task.

(C) Stakhanov's innovations were twofold: he encouraged the adoption of new technology and of specialized roles for his fellow miners.

(D) *TIME* magazine featured Stakhanov on its cover when he was alive; today, his legacy lives on through the eponymous term "Stakhanovite."

READING AND WRITING MODULE 2 (HARDER)

Conservation efforts to preserve the Great Barrier Reef have been _____, with international agencies and Australian state and federal governments collaborating to protect the world's largest coral reef. These bodies created numerous legislation to regulate human activities, conserve the region's biodiversity, and preserve the ecological integrity of the reef.

B impair

C destroy

D conceal

The panhandle of Oklahoma has _____ history. Considered no man's land until 1907, when it became a part of the state, the three counties that make up this area were hit particularly hard by the Great Depression of the 1930s, causing massive out-migration. In 2016, their combined population was still less than it was in 1907.

PREV. QUESTION NEXT QUESTION

3. Which choice completes the text with the most logical and precise word or phrase?

× A an unremarkable

× B an obscure

× C a turbulent

× D a serene

While many factors influence inflation rates, consumer psychology is a variable that is often _____ by the news media. Economist Kenneth Rogoff urges media outlets to modify their coverage of economic issues like inflation so that they do not push consumers to alter their purchasing behavior in ways that exacerbate the situation. For instance, after a sensational news report on a toilet paper shortage, consumers may rush to stockpile it, leading to prolonged shortages and elevated prices.

PREV. QUESTION NEXT QUESTION

4. Which choice completes the text with the most logical and precise word or phrase?

× A neglected

× B hyperbolized

× C distorted

× D considered

Text 1

According to researchers Christine Porath and Christine Pearson, incivility in the American workplace grew significantly in the early 2000s. In interviews conducted by the researchers, 98% of workers said they had a rude interaction at least once during their employment, and half of respondents said they experienced disrespect at least once a week. Pearson and Porath conclude these numbers should alarm executives because a rise in incivility corresponds to a decline in employee morale and productivity.

Text 2

Researcher Shannon Taylor surveyed employees of casual dining restaurants in the US. In the survey, 69% of employees said they experienced some hostility at work during the past year. However, only 16% said the incivility came from colleagues. Taylor argues that while workplace disrespect is hurtful, it comes mostly from customers or a few rude coworkers who are not representative of the greater whole. Thus, she concludes that, with few exceptions, workplaces are generally respectful.

PREV. QUESTION NEXT QUESTION

5. Based on the texts, how would Taylor (Text 2) characterize Porath's and Pearson's conclusion as described in Text 1?

× A As demoralizing, because it suggests that reforming workplaces into kind environments will take a long time.

× B As discredited, because recent data shows that few workers experience any hostility at all in the workplace.

× C As alarming, because it shows how pervasive workplace incivility has become due to lax executive oversight.

× D As exaggerated, because while workplace disrespect is harmful, it is not as widespread as they suggest.

Studies show that elevations of at least 3,000 meters can have adverse physiological effects, including fatigue, shortness of breath, and increased heart rate; as altitude increases, air pressure and oxygen levels decrease, leading to lower oxygen availability for the body, a phenomenon known as hypoxia. One can mitigate unwanted side effects when climbing high altitudes by ascending gradually, allowing the body time to acclimatize. Experts also recommend adequate hydration, which helps maintain blood volume and circulation, to support the body's acclimation process.

PREV. QUESTION NEXT QUESTION

6. According to the text, what can trigger hypoxia?

× A Dehydration, which can accelerate the acclimatization process

× B Higher oxygen levels at higher altitudes, which can cause hyperventilation

× C Poor blood circulation, which can increase pressure on the lungs

× D Less oxygen in the atmosphere, which can lower oxygen levels in the body

The following text is from the 2nd century BCE work *Histories* by Polybius.

If we look however at separate details, for instance at the provisions for carrying on a war, we shall find that whereas for a naval expedition the Carthaginians are the better trained and prepared—as it is only natural with a people with whom it has been hereditary for many generations to practice this craft, and to follow the seaman's trade above all nations in the world—yet, in regard to military service on land, the Romans train themselves to a much higher pitch than the Carthaginians. The former bestow their whole attention upon this department, whereas the Carthaginians wholly neglect their infantry, though they do take some slight interest in the cavalry.

PREV. QUESTION NEXT QUESTION

7. According to the text, how did the Carthaginians differ from the Romans?

× A The Carthaginians had a thriving sea trade while the Romans had skilled soldiers.

× B The Carthaginians had no army, only a navy, while the Romans had a well-rounded military.

× C The Carthaginians had better-trained infantry while the Romans had stronger cavalry.

× D The Carthaginians had a superior navy while the Romans had a more powerful army.

The following text is from Sultan Murad II's 15th-century poem "Ruba'i."

> Cupbearer, bring, bring here again my yester even's wine;
> My harp and rebec bring, them bid address this heart of mine:
> While still I live, 'tis meet that I should mirth and glee enjoy;
> The day shall come when none may e'en my resting-place Divine.

PREV. QUESTION | NEXT QUESTION

8. Which choice best states the main idea of the text?

- ✖ A. The spirit of joy comes from the divine.
- ✖ B. Wine and music are necessary components of happiness.
- ✖ C. Life should be enjoyed as much as possible.
- ✖ D. Bliss is the only feeling one should feel in life.

Indian artist M.F. Husain is considered the "godfather" of contemporary Indian art because he was one of the first Indian artists to break away from traditional styles. Inspired by his trip to Europe in the 1950s where he discovered the works of Pablo Picasso, Husain began integrating Cubist elements—bold lines and geometric shapes within a two-dimensional scene—into his pieces. In a paper for an art history class, a student claims a Cubist style alone cannot define Husain's art. Rather, Husain's artistic approach encompasses various elements influenced by his diverse experiences, such as his work with calligraphy, which left an imprint on some of his paintings' styles.

PREV. QUESTION NEXT QUESTION

9. Which finding, if true, would most directly support the student's claim?

✖ A Inspired by his experience in Mumbai, the painting *Between the Spider and the Lamp* uses detailed, delicate strokes, particularly in the background, which features symbols resembling hieroglyphics.

✖ B Husain's painting *The Last Supper*, which sold for over $2 million, was thought to be valued so highly due to its unusual take on Leonardo da Vinci's iconic painting of Jesus Christ eating with his disciples.

✖ C Husain's paintings frequently featured horses as a recurring subject, portrayed in various ways that often incorporated blocky shapes alongside bold, dynamic contours and juxtaposed colors.

✖ D Husain, being both a painter and a filmmaker, achieved recognition for his 1967 film *Through the Eyes of Painter*, which captures the essence of Rajasthan, a region that regularly inspired the subject matter of his paintings.

Isabelle Eberhardt was an explorer during the late 19th and early 20th centuries. She traveled extensively throughout North Africa, immersing herself in local cultures and documenting her experiences in articles, journal entries, and one novel, *Vagabond*. In a paper for a women's studies class, a student claims that Eberhardt disregarded the gender norms of her time, adopting a male persona to challenge the patriarchal societies of the region.

PREV. QUESTION NEXT QUESTION

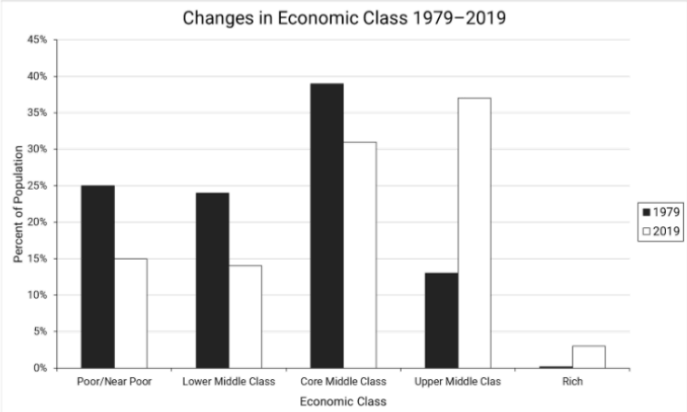

10. Which finding, if true, would most directly support the student's claim?

× A Eberhardt was the illegitimate daughter of a Russian noblewoman who ran away from her husband to Switzerland.

× B Eberhardt loved the swashbuckling life of the soldiers of the French Foreign Legion and traveled North Africa in their company.

× C Eberhardt shaved her head, wore male clothing, and used a male name, knowing Arab society would hesitate to question her true identity.

× D Eberhardt began publishing her fiction in respected magazines using a male pseudonym when she was eighteen years old.

Many economists believe that real incomes, incomes of individuals adjusted for inflation, decreased from the early 1980s to the late 2010s, creating financial hardship for most American families. However, labor economist Stephen Rose criticizes this assumption. According to his research on transitions between economic classes from 1979 to 2019, a large number of people experienced significant economic growth. For example, _____.

PREV. QUESTION NEXT QUESTION

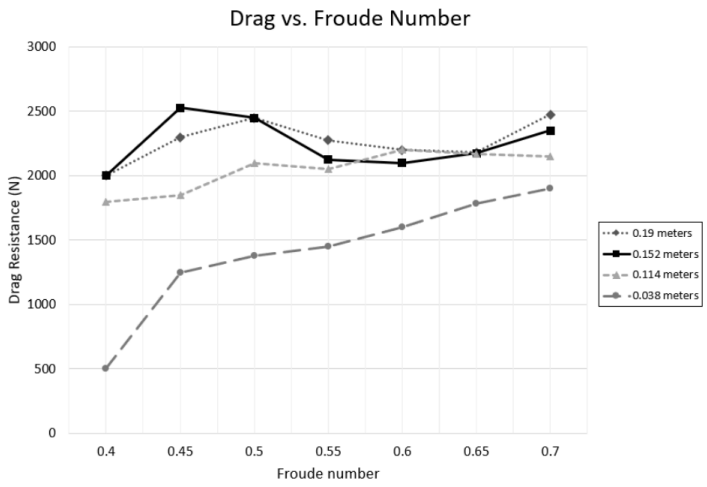

11. Which choice most effectively uses data from the table to complete the example?

× A the percentage of the rich grew from a tiny percentage in 1979 to nearly 3% of the population in 2019.

× B the percentage of the population in the upper-middle class more than doubled from 1979 to 2019.

× C The percentage of the poor and near poor stayed relatively the same from 1979 to 2019.

× D The core middle class experienced a slight decrease between 1979 and 2019, from around 40% to a little over 30%.

Alessandro Utomo and his colleagues from Universitas Indonesia were inspired by a sailfish to redesign the hulls of catamarans, which are sailing boats. They employed biomimicry to modify the vessel's drag by elongating parts of the craft according to a sailfish's proportions. When examining different lengths of stern trim, the researchers computed the total drag resistance of each using Froude numbers, found by dividing gravity and displacement by velocity; higher resistance at a given Froude number indicates more drag and inefficiency. Based on the calculations, the researchers concluded that for each stern trim length, an increased Froude number does not necessarily correspond to increased drag resistance.

PREV. QUESTION NEXT QUESTION

12. Which choice best describes data from the graph that support the researchers' conclusion?

✖ A At the Froude number of 0.65, the drag resistance of 0.152 meters of trim was just over 2,100 N, but it was lower at the 0.038-meter configuration—1,700 N.

✖ B In the 0.038 meter trim configuration, drag resistance increased along with every increase of the Froude number.

✖ C Increasing the Froude number from 0.4 to 0.45 creates an increase in drag resistance for the 0.038 trim configuration but a decrease for the 0.114 configuration.

✖ D In the 0.152 meter trim configuration, the drag resistance decreases briefly between the Froude numbers of 0.5 and 0.55.

Variegated fairy-wrens and splendid fairy-wrens are two small songbirds found in Australia. Because they often occupy the same eucalyptus scrubland, different species of fairy-wrens often interact with each other. Both variegated fairy-wrens and splendid fairy-wrens have been known to aggressively defend their territory from unfamiliar birds. However, in one study, researchers Allison Johnson, Christina Masco, and Stephen Pruett-Jones found that variegated fairy wrens shared their territory with certain splendid fairy-wrens, while also fending off other splendid fairy-wrens, suggesting that _____

PREV. QUESTION NEXT QUESTION

13. Which choice most logically completes the text?

× A variegated fairy-wrens possess the ability to recognize and distinguish individuals apart from their own subspecies.

× B both variegated fairy-wrens and splendid fairy-wrens possess the ability to recognize species apart from their own.

× C variegated fairy-wrens and splendid fairy-wrens may form mixed-species flocks to improve their defense from other invaders.

× D variegated fairy-wrens do not possess the ability to distinguish between individuals of their own subspecies and splendid fairy-wrens.

Many Americans use credit cards and carry debt on household items like cell phones, televisions, furniture, and cars. However, this wasn't always the case. Until the early 20th century, financial institutions considered loans to individual consumers unprofitable and lent solely to businesses. Only with the rise of auto loan companies did everyday shoppers receive access to significant credit. These companies served as middlemen—they borrowed money from banks and re-lent it to consumers for vehicle purchases. This suggests that _____.

PREV. QUESTION NEXT QUESTION

14. Which choice most logically completes the text?

× A successful car loan ventures paved the way for widespread consumer debt.

× B finance companies were predatory lenders who exploited consumers.

× C the advent of new technology extended loans to other household items.

× D credit cards emerged as an efficient way to lend money to auto buyers.

Lady Arbella Stuart had a strong claim to the English throne. Her parents were of royal heritage, and she was the cousin of Queen Elizabeth I, who had no children of her own. Stuart was known as the "learned lady"; well-educated, she spoke several languages and was an excellent writer. However, after the passing of Elizabeth I, the English Parliament chose her cousin, King James of Scotland, to become the English king. James had a large army, three healthy children (potential heirs), and a wife who was the daughter of the King of Denmark, a potential ally. Thus, _____

PREV. QUESTION NEXT QUESTION

15. Which choice most logically completes the text?

× A Parliament chose the candidate who had the more relevant qualifications for the throne.

× B Parliament disregarded Arbella Stuart because of her gender, preferring her male relative, James.

× C Parliament favored James as the next English monarch due to his political and military advantages.

× D Parliament illegally denied Arbella Stuart the English crown by giving it to the Scottish king.

The Federal Open Market Committee is responsible for setting the federal funds rate. When the rate is lowered, banks can offer lower interest rates on loans. However, some economists _____ that the decision to decrease the federal funds rate from 6.5% to 1% in 2003 ultimately contributed to the US financial crisis in 2007.

× A Regardless,

× B In conclusion,

× C Likewise,

× D Thus,

While researching a topic, a student has taken the following notes:

- Charlotte Gage founded the advocacy organization Adfree Cities in 2020.
- Adfree Cities is based in the United Kingdom and seeks to replace the "sight pollution" of large billboard advertisements with appealing "community arts" projects, according to Gage.
- The UK cities of Bristol and Norwich are receptive to the ad replacement movement.
- The Brazilian metropolis of Sao Paulo banned all billboard advertisements in 2006.
- The capital of the Netherlands, Amsterdam, banned some billboard advertisements for automobiles and airlines in 2021.

PREV. QUESTION NEXT QUESTION

26. The student wants to emphasize the move to ban billboard advertisements in the UK as well as in other countries. Which choice most effectively uses relevant information from the notes to accomplish this goal?

× A The organization Adfree Cities aims to reduce sight pollution by replacing unsightly billboard advertisements with more visually appealing art projects.

× B Gage's project of eliminating "sight pollution" would recreate billboards as venues for local arts projects, and cities such as Bristol and Norwich are open to this initiative.

× C Amsterdam is among the major cities in Europe that has recently placed restrictions on billboard advertising, particularly concerning automobiles and airlines.

× D The UK organization Adfree Cities seeks to replace billboard advertisements with art, following the lead of cities like Sao Paulo, which implemented a complete ban in 2006.

While researching a topic, a student has taken the following notes:

- Known as the "Indian Dr. Seuss," Anushka Ravishankar is an author of children's books and a founder of the publishing company Duckbill Books.
- She has written in several different genres, both creating stories of her own and conveying classic knowledge in new ways.
- Her book *The Storyteller* is a condensed retelling of *The Thousand and One Nights*, a classic of Islamic literature originating in the tenth century.
- She also created the *Smartypants* series of illustrated informational books for children, which include *Evolution for Smartypants*, *Photosynthesis for Smartypants*, and *Gravity for Smartypants*.

PREV. QUESTION

27. The student wants to emphasize the many topics that Anushka Ravishankar covers in her books. Which choice most effectively uses relevant information from the notes to accomplish this goal?

× A Ravishankar's reputation as the "Indian Dr. Seuss" is partly due to her illustrated books for children, such as the *Smartypants* series.

× B One of Ravishankar's books, *The Storyteller*, is a rendition of the Islamic classic *The Thousand and One Nights*.

× C Anushka Ravishankar's works encompass various genres, from condensed retellings of classic literature to creating the scientific *Smartypants* series.

× D Anushka Ravishankar's informative books like *Evolution for Smartypants* and *Gravity for Smartypants* are written to engage and educate children.
