Question

The most recent iteration of the immersive theater experience *Sleep No More*, which premiered in New York City in 2011, transforms its performance space—a five-story warehouse—into a 1930s-era hotel. Audience members, who wander through the labyrinthine venue at their own pace and follow the actors as they play out simultaneous, interweaving narrative loops, confront the impossibility of experiencing the production in its entirety. The play's refusal of narrative coherence thus hinges on the sense of spatial fragmentation that the venue's immense and intricate layout generates.

What does the text most strongly suggest about *Sleep No More*'s use of its performance space?

Answer

A. The choice of a New York City venue likely enabled the play's creators to experiment with the use of theatrical space in a way that venues from earlier productions could not.

B. Audience members likely find the experience of the play disappointing because they generally cannot make their way through the entire venue.

C. The production's dependence on a particular performance environment would likely make it difficult to reproduce exactly in a different theatrical space.

D. Audience members who navigate the space according to a recommended itinerary will likely have a better grasp of the play's narrative than audience members who depart from that itinerary.

Correct Answer: C

Rationale

Choice C is the best answer. The text says that the production's use of its large, winding space has a very specific effect on the audience. Given that the space itself is so important to creating this effect, it would be difficult to reproduce the production in a different space.

Choice A is incorrect. The fact that the venue is in New York City isn't connected to the experimental nature of the performance. It's the size of the venue, not its location in New York, that affects the theatrical experience. Choice B is incorrect. The text never suggests that audience members are disappointed because they can't see the entire production. In fact, it suggests that that's an important part of the experience. Choice D is incorrect. The text doesn't mention a recommended itinerary for audience members.

Question ID: 1a2b29c9

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	Hard

Question

The following text is adapted from María Cristina Mena's 1914 short story "The Vine-Leaf."

> It is a saying in the capital of Mexico that Dr. Malsufrido carries more family secrets under his hat than any archbishop.
>
> The doctor's hat is, appropriately enough, uncommonly capacious, rising very high, and sinking so low that it seems to be supported by his ears and eyebrows, and it has a furry look, as if it had been brushed the wrong way, which is perhaps what happens to it if it is ever brushed at all. When the doctor takes it off, the family secrets do not fly out like a flock of parrots, but remain nicely bottled up beneath a dome of old and highly polished ivory.

Based on the text, how do people in the capital of Mexico most likely regard Dr. Malsufrido?

Answer

A. Many have come to tolerate him despite his disheveled appearance.

B. Few feel concerned that he will divulge their confidences.

C. Some dislike how freely he discusses his own family.

D. Most would be unimpressed by him were it not for his professional expertise.

Correct Answer: B

Rationale

Choice B is the best answer. The text describes a saying in the capital that Malsufrido keeps more secrets than an archbishop. It also says that when he takes off his hat, "the family secrets do not fly out… but remain nicely bottled up," suggesting that he will not betray his confidences.

Choice A is incorrect. This choice doesn't reflect the text. While his hat is large and appears to have been brushed in the wrong direction, Dr. Malsufrido does not seem to be regarded as ill-dressed or disheveled. Choice C is incorrect. This choice is the opposite of what the text says. The secrets of families (his and others') remain "bottled up" in his head. Choice D is incorrect. This choice isn't supported by the text. His professional expertise is not discussed in the passage.

Question ID: 2fdfe002

Question

The following text is adapted from Countee Cullen's 1926 poem "Thoughts in a Zoo."

> They in their cruel traps, and we in ours,
>
> Survey each other's rage, and pass the hours
>
> Commiserating each the other's woe,
>
> To mitigate his own pain's fiery glow.
>
> Man could but little proffer in exchange
>
> Save that his cages have a larger range.
>
> That lion with his lordly, untamed heart
>
> Has in some man his human counterpart,
>
> Some lofty soul in dreams and visions wrapped,
>
> But in the stifling flesh securely trapped.

Based on the text, what challenge do humans sometimes experience?

Answer

A. They cannot effectively tame certain wild animals because of a lack of compassion.

B. They cannot focus on setting attainable goals because of a lack of motivation.

C. They quickly become frustrated when faced with difficult tasks because of a lack of self-control.

D. They have aspirations that cannot be fulfilled because of certain limitations.

Correct Answer: D

Rationale

Choice D is the best answer. The text metaphorically likens humans to animals in a zoo, suggesting that humans have dreams that they cannot fulfill because they are trapped.

Choice A is incorrect. The speaker says that the lion has an "untamed heart," but the speaker doesn't actually mention anything about humans taming wild animals or a lack of compassion. Choice B is incorrect. The speaker doesn't suggest that humans lack motivation. Rather, the speaker thinks that humans are "trapped" and prevented from achieving their dreams. Choice C is incorrect. The speaker doesn't mention anything about humans becoming frustrated or lacking self-control. Rather, the speaker thinks that humans are "trapped" and prevented from achieving their dreams.

SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	Hard

Question

For centuries, the widespread acknowledgment of the involvement of the cerebellum—a dense brain structure in vertebrates—in coordinating motor control in humans has hindered recognition of other possible functions of the structure. Neuroscience research from the last two decades now suggests that the cerebellum regulates emotion and social behavior, and recent research by Ilaria Carta and colleagues has identified a pathway connecting the cerebellum to a center for motivation and reward processing known as the ventral tegmental area (VTA).

Which choice best states the main idea of the text?

Answer

A. The recent verification of a pathway between the VTA and the cerebellum confirms the cerebellum's long-suspected role in motor coordination.

B. Recent advances in the field of neuroscience have challenged widely accepted claims about the function of a pathway connecting the VTA and the cerebellum.

C. The cerebellum has primarily been thought to regulate motor functioning, but in recent years neuroscience researchers have been uncovering additional functions.

D. Technological limitations have historically hindered the study of the cerebellum, but the recent development of new technologies has led to greater insights into its functions.

Correct Answer: C

Rationale

Choice C is the best answer. The text says that the cerebellum has long been thought to regulate motor functioning, but new research shows that it may also have other functions—including regulating emotion and social behavior and some connection to motivation and rewards processing.

Choice A is incorrect. The VTA is described as "a center for motivation and reward processing," and the discovery of the pathway between the VTA and the cerebellum supports the theory that the cerebellum is involved in functions other than motor coordination. Choice B is incorrect. The text says that recent research has identified this pathway, but it doesn't discuss any previous "widely accepted claims" about the pathway's function. The "widespread acknowledgement" mentioned early in the passage is about the cerebellum alone, not its connection to the VTA. Choice D is incorrect. The text never discusses any technological limitations or any new technologies.

Question ID: 35b46381

Question

In their 2022 paper, Christos Dimopoulos et al., having granted that the existence of antigravity—in which antimatter and matter repel rather than attract each other—lacked affirmative experimental support, rightly argued that such antigravity was worth considering on theoretical grounds given that evidence against it was similarly lacking. But a 2023 report by an international team of researchers details the first direct ballistic observations of antihydrogen atoms under gravity inside a CERN particle accelerator. Corresponding most closely to predictions under gravitational attraction, these observations were thoroughly inconsistent with antigravity.

Which choice best states the main idea of the text?

Answer

A. Antihydrogen ballistics observations were conducted at CERN to test specific conclusions about antigravity presented in the 2022 paper by Dimopoulos et al.

B. Although theoreticians were justified in studying antigravity before the release of the 2023 report, the report's findings suggest that the rationale for theoretical consideration offered in the 2022 paper by Dimopoulos et al. is no longer applicable.

C. The theoretical approach represented in the 2022 paper by Dimopoulos et al. assumed that unambiguous proof of antigravity would not be achievable, but the results in the 2023 report undermine that assumption.

D. Before 2023, researchers' inordinate focus on theoretical considerations hindered the development of the experimental regimen for direct antihydrogen ballistics observations.

Correct Answer: B

Rationale

Choice B is the best answer because it most accurately states the main idea of the text. The text begins by acknowledging that in 2022, Dimopoulos et al. were justified in arguing for antigravity on theoretical grounds because although there was no experimental evidence supporting its existence at that time, there was no evidence contradicting its existence either. The text then introduces the 2023 report describing an experiment that produced observations "thoroughly inconsistent with antigravity." Thus, the main idea is that while the study of antigravity was theoretically justified before the 2023 report (due to lack of evidence against it), the report's findings undermine the rationale for such theoretical consideration since there is now evidence against this hypothetical phenomenon.

Choice A is incorrect. Although antihydrogen ballistics observations were conducted at CERN, the text provides no evidence that they were conducted to test conclusions in Dimopoulos et al.'s 2022 paper. Rather, the text presents the 2023 report as new evidence that contradicts the existence of the hypothetical phenomenon that Dimopoulos et al. had considered. Choice C is incorrect because the text doesn't suggest that Dimopoulos et al. assumed that unambiguous proof of antigravity would be unattainable. Rather, the text states that they argued antigravity was worth considering theoretically because evidence against it was lacking at that time. At the same time, the results in the 2023 report do not undermine but strengthen the idea that the proof of antigravity might not be achievable. Choice D is incorrect because the text doesn't suggest that there was an "inordinate focus on theoretical considerations" before 2023 or that such a focus hindered the development of experimental methods. In fact, the text describes Dimopoulos et al.'s position regarding the theoretical consideration of antigravity as "rightly argued," indicating approval of their approach given the absence of experimental evidence at that time.

Question ID: d0fbf1ae

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	Hard

Question

Algae living within the tissues of corals play a critical role in keeping corals, and the marine ecosystems they are part of, thriving. Some coral species appear brown in color when healthy due to the algae colonies living in their tissues. In the event of an environmental stressor, the algae can die or be expelled, causing the corals to appear white. To recover the algae, the bleached corals then begin to produce bright colors, which block intense sunlight, encouraging the light-sensitive algae to recolonize the corals.

What does the text most strongly suggest about corals that produce bright colors?

Answer

A. These corals have likely been subjected to stressful environmental conditions.

B. These corals are likely more vulnerable to exposure from intense sunlight than white corals are.

C. These corals have likely recovered from an environmental event without the assistance of algae colonies.

D. These corals are more likely to survive without algae colonies than brown corals are.

Correct Answer: A

Rationale

Choice A is the best answer. The text says that corals produce bright colors to block sunlight and encourage algae to recolonize after “an environmental stressor.” From this, we can infer that corals that produce bright colors have probably been subjected to an environmental stressor.

Choice B is incorrect. The text says that corals produce bright colors to block intense sunlight, which protects the light-sensitive algae that keep the coral healthy. In other words, bright colors make the coral’s health less vulnerable to intense sunlight. Choice C is incorrect. The text says that corals produce bright colors to encourage algae to recolonize, not that they have recovered without the assistance of algae colonies. Choice D is incorrect. The text never compares the likelihood of differently colored corals surviving without algae colonies.

Question ID: 14189fbb

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	Hard

Question

Having written the impassioned call to arms “Letter to the Spanish Americans” in 1791, Peruvian intellectual Juan Pablo Viscardo y Guzmán is often considered a forerunner for the independence movements in Latin America. But Viscardo’s role in history would have remained insignificant were it not for Venezuelan revolutionary Francisco de Miranda, who was handed the unpublished letter after Viscardo’s death. Miranda not only helped circulate the letter, but his edits and footnotes to the text position Miranda as a central figure in the text’s creation.

Which choice best states the main idea of the text?

Answer

A. The original authorship of “Letter to the Spanish Americans” is disputed by contemporary historians.

B. The majority of the most eloquently stated arguments in “Letter to the Spanish Americans” were written by Miranda.

C. Miranda played a crucial role in influencing the content and distribution of “Letter to the Spanish Americans.”

D. “Letter to the Spanish Americans” persuaded many people in Latin America to pursue national independence.

Correct Answer: C

Rationale

Choice C is the best answer. The text describes how Miranda circulated, edited, and added footnotes to “Letter to the Spanish Americans,” and it claims that the letter and its author would have “remained insignificant” if it weren’t for Miranda’s efforts.

Choice A is incorrect. The text only says that Viscardo wrote the letter and that Miranda edited it: it never suggests that the original authorship of the letter is up for debate. Choice B is incorrect. This contradicts the text. The text says that Miranda edited and footnoted the letter, but it identifies Viscardo as the letter’s author. It also never identifies certain arguments as more eloquent than others. Choice D is incorrect. This is outside the scope of the text. The paragraph describes Miranda’s role in the creation and distribution of the letter, but it doesn’t get into the effects of the letter on other people.

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	Hard

Question

In a paper about p-i-n planar perovskite solar cells (one of several perovskite cell architectures designed to collect and store solar power), Lyndsey McMillon-Brown et al. describe a method for fabricating the cell's electronic transport layer (ETL) using a spray coating. Conventional ETL fabrication is accomplished using a solution of nanoparticles. The process can result in a loss of up to 80% of the solution, increasing the cost of manufacturing at scale—an issue that may be obviated by spray coating fabrication, which the researchers describe as "highly reproducible, concise, and practical."

What does the text most strongly suggest about conventional ETL fabrication?

Answer

A. It is less suitable for manufacturing large volumes of planar p-i-n perovskite solar cells than an alternative fabrication method may be.

B. It is more expensive when manufacturing at scale than are processes for fabricating ETLs used in other perovskite solar cell architectures.

C. It typically entails a greater loss of nanoparticle solution than do other established approaches for ETL fabrication.

D. It is somewhat imprecise and therefore limits the potential effectiveness of p-i-n planar perovskite solar cells at capturing and storing solar power.

Correct Answer: A

Rationale

Choice A is the best answer. Conventional solar cell fabrication increases "the cost of manufacturing at scale," but spray coating might get rid of that problem.

Choice B is incorrect. This is not completely supported by the text. While it's true that conventional ETL fabrication is expensive at scale, there's nothing in the text that mentions other perovskite solar cell architectures. Choice C is incorrect. This choice does not match the text. Only one conventional method of ETL fabrication is described, so we can't compare the solution loss in this method to that of other conventional methods. Choice D is incorrect. This choice isn't supported by the text. The text never suggests that the effectiveness of solar cells changes based on their method of fabrication.

Question ID: d1b8a9ad

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	Hard

Question

Disco remains one of the most ridiculed popular music genres of the late twentieth century. But as scholars have argued, the genre is far less superficial than many people believe. Take the case of disco icon Donna Summer: she may have been associated with popular songs about love and heartbreak (subjects hardly unique to disco, by the way), but like many Black women singers before her, much of her music also reflects concerns about community and identity. These concerns are present in many of the genre's greatest songs, and they generally don't require much digging to reveal.

What does the text most strongly suggest about the disco genre?

Answer

A. It has been unjustly ignored by most scholars despite the importance of the themes addressed by many of the genre's songs.

B. It evolved over time from a superficial genre focused on romance to a genre focused on more serious concerns.

C. It has been unfairly dismissed for the inclusion of subject matter that is also found in other musical genres.

D. It gave rise to a Black women's musical tradition that has endured even though the genre itself faded in the late twentieth century.

Correct Answer: C

Rationale

Choice C is the best answer. The text argues that disco is "far less superficial" than its popular perception might indicate, and that love and heartbreak are "subjects hardly unique to disco."

Choice A is incorrect. This choice conflicts with the text, which says that scholars argue that disco "is far less superficial than many people believe." Choice B is incorrect. This choice says the opposite of what the text suggests. The writer argues that the genre is not as superficial as commonly believed, but that it always reflected "concerns about community and identity." Choice D is incorrect. The text doesn't support this choice. There's nothing in the text about disco giving rise to an enduring Black women's musical tradition.

Question ID: e80ba20d

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	Hard

Question

Philosophers note that many people have an intuitive sense that while we ought not to lie, there may be circumstances in which lying is permissible. If this intuition is correct and we lack an inviolable duty to speak truthfully, what grounds opposition to lying in the first place? Japa Pallikkathayil has advanced one answer by appealing to a duty to respect others' agential interests: the possession of false beliefs constrains agency, and thus we ought not to impede the formation of true beliefs unless doing so prevents a greater constraint on someone's agency or an otherwise impermissible end.

Which choice best states the main idea of the text?

Answer

A. One potential means of justifying opposition to lying is Pallikkathayil's argument that we have an obligation to respect other people's agency that entails a commitment to truthfulness except in certain circumstances.

B. Many people have an intuitive sense that lying is permissible in some circumstances but lack a principled way to identify those circumstances, and Pallikkathayil's argument may provide a means of resolving that problem.

C. Pallikkathayil's argument suggests that if we have a duty to respect other people's agential interests and if possession of false beliefs constrains agency, then we have an inviolable duty to speak truthfully.

D. Pallikkathayil's argument shows that if our intuition that circumstances may make lying permissible is correct, then it is unclear whether there are any grounds for an opposition to lying in the first place.

Correct Answer: A

Rationale

Choice A is the best answer because it most accurately states the main idea of the text. The text begins by noting a common intuition that lying might sometimes be permissible, which raises the question of what is the reason for being against lying. The text then presents Pallikkathayil's answer to this question: we have a duty to respect others' agential interests (that is, we have an obligation to allow people to exercise their free will in order to best serve their own ends), false beliefs constrain agency (the implication here being that people who are deceived about what is true are impeded in acting in their own best interests), and so we should not hinder the formation of true beliefs (we should not deliberately deceive a person) unless doing so prevents a greater limitation on someone's agency or prevents some otherwise impermissible end (for example, it might be morally permissible to lie to someone in the rare circumstance where a false belief would lead a person to act in their own best interest, and where they would not do so if they knew the truth). Thus, the main idea of the text is that Pallikkathayil offers a potential justification for opposing lying based on respecting agency, while still allowing for exceptions in specific circumstances.

Choice B is incorrect because the text doesn't focus on people's lack of a principled way to identify circumstances where lying is permissible or indicate that Pallikkathayil's argument resolves this specific problem. Rather, the text presents Pallikkathayil's argument that lies limit agency but may be permitted in very specific situations (to prevent a greater limitation on someone's agency or an otherwise unacceptable outcome) as one of a number of possible arguments about why lies are undesirable but sometimes permissible. Choice C is incorrect because it directly contradicts the text. Pallikkathayil's argument, as described in the text, wouldn't lead to an "inviolable duty to speak truthfully." On the contrary, the text explicitly states that Pallikkathayil's position is that interfering with people developing accurate beliefs is wrong, except when such interference prevents either a more significant limitation on someone's agency or an outcome that would be unacceptable for other reasons. This indicates that Pallikkathayil's argument allows for some exceptions to the duty to speak truthfully, making it not inviolable. Choice D is incorrect because Pallikkathayil's argument doesn't suggest that if it is permissible to lie in at least some circumstances, then it is unclear whether there are good reasons for opposing lying in any circumstances. Instead, the text presents Pallikkathayil as offering a specific ground

for opposing lying (respecting others' ability to act in their own best interests) while qualifying that assertion by presenting a situation in which lying might sometimes be morally permissible.

Question ID: 16025337

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	Hard

Question

The following text is adapted from William Shakespeare's 1609 poem "Sonnet 27." The poem is addressed to a close friend as if he were physically present.

Weary with toil, I [hurry] to my bed,

The dear repose for limbs with travel tired;

But then begins a journey in my head

To work my mind, when body's work's expired:

For then my thoughts—from far where I abide—

[Begin] a zealous pilgrimage to thee,

And keep my drooping eyelids open wide,

What is the main idea of the text?

Answer

A. The speaker is asleep and dreaming about traveling to see the friend.

B. The speaker is planning an upcoming trip to the friend's house.

C. The speaker is too fatigued to continue a discussion with the friend.

D. The speaker is thinking about the friend instead of immediately falling asleep.

Correct Answer: D

Rationale

Choice D is the best answer it most accurately states the main idea of the text. The speaker describes going to bed for "repose" (rest) but finding that his thoughts are focused on the friend the speaker is addressing, and the thoughts are keeping the speaker awake.

Choice A is incorrect because the speaker isn't asleep; the thoughts about the friend are keeping the speaker awake. Choice B is incorrect because the speaker isn't talking about taking a literal trip; rather, the speaker uses the metaphor of a journey to describe internal thoughts. Choice C is incorrect because the speaker isn't having a discussion with the friend.

Question ID: 34c2e387

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	Hard

Question

Jürgen Kocka and other historians of capitalism rarely discuss domestic capitalism in Africa before the period of European colonization, implicitly presenting capitalism as external to and imposed on Africa. Crislayne Alfagali and other Africanist scholars have shown, however, that in parts of Africa, returns-focused investment, the establishment of open markets for wage labor, and other features of capitalism predated colonization. One reason for this discrepancy is that historians of capitalism tend to focus on longitudinal economic data drawn from archival records, which do not exist for much of precolonial Africa.

Which statement about Alfagali and other Africanist scholars is best supported by information in the text?

Answer

A. They likely make use of different types of evidence than historians of capitalism typically rely on.

B. They likely differ from historians of capitalism in the methods they use to derive longitudinal economic data from archival records.

C. They likely have a different view about which activities should be considered capitalist in nature than historians of capitalism do.

D. They likely view capitalism as having been more beneficial for Africa than historians of capitalism do.

Correct Answer: A

Rationale

Choice A is the best answer because it presents a statement about Alfagali and other Africanist scholars that is supported by the text. The last sentence of the text explains that historians of capitalism generally rely on a type of data that requires "archival records, which do not exist for much of precolonial Africa." Nevertheless, Alfagali and other Africanist scholars have demonstrated that features of capitalism including "returns-focused investment,...open markets for wage labor, and other features of capitalism" existed in parts of Africa before colonization. Because archival records typically used by historians of capitalism aren't available for precolonial Africa, Alfagali and other Africanist scholars of precolonial capitalism in Africa likely used atypical sources for their studies.

Choice B is incorrect because the text states that archival records containing longitudinal economic data "do not exist for much of precolonial Africa." If these records don't exist for precolonial Africa, then Alfagali and other Africanist scholars couldn't derive data from them by any method. Choice C is incorrect because the text doesn't suggest that Alfagali and other Africanist scholars define capitalism differently than other historians of capitalism do. On the contrary, the text simply asserts that specific features they found, such as "returns-focused investment [and] open markets for wage labor," are "features of capitalism," which implies scholarly agreement that these activities are capitalist in nature. Choice D is incorrect because the text doesn't indicate any effects of capitalism in Africa, positive or negative. Rather, the text explains why precolonial Africa has been omitted from mainstream histories of capitalism and presents work by Alfagali and other Africanist scholars that challenges and corrects the historical record of precolonial capitalism.

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	Hard

Question

The fynbos shrubland is a diverse habitat found only in South Africa. It is adjacent to the Afro-temperate forest, with almost no transition space between the two distinct habitats. Plants in the fynbos have uniquely thin and long root systems that spread out over large distances to absorb nutrients from the soil. Ecologists transplanted tree seedlings from the forest into plots in the fynbos. Seedlings in plots isolated from the roots of fynbos plants exhibited a growth rate five times greater than that of the seedlings in plots in close proximity to the roots of fynbos plants.

Based on the text, what role do fynbos roots most likely have in maintaining the border between the fynbos shrubland and the Afro-temperate forest habitats?

Answer

A. Fynbos roots damage the root systems of forest plants, leaving those plants unable to acquire sufficient nutrients.

B. Fynbos roots extend close enough to the forest plants' roots that they constitute a physical barrier that forest plants' roots cannot pass.

C. The root systems of fynbos plants allow the plants to take in so many soil nutrients that forest plants are prevented from flourishing in the fynbos.

D. The root systems of fynbos plants enhance the soil immediately surrounding the plants, allowing them to thrive in an otherwise harsh habitat.

Correct Answer: C

Rationale

Choice C is the best answer because it presents a conclusion about the role of fynbos roots in maintaining the border with the Afro-temperate forest that can be reasonably inferred from the text. The text states that plants in the fynbos have "uniquely thin and long root systems that spread out over large distances to absorb nutrients from the soil." The text then describes an experiment where forest tree seedlings grown in plots isolated from fynbos roots grew at a rate five times greater than seedlings in areas near fynbos roots. This strongly suggests that fynbos roots are depleting soil nutrients to such an extent that forest plants can't get enough nutrients from that soil to flourish, thereby hindering the formation of any significant "transition space" between the habitats and helping keep the border between them sharp.

Choice A is incorrect because there is no evidence in the text that fynbos roots physically damage the root systems of forest plants. Instead, the text explicitly describes fynbos plants as having "uniquely thin and long root systems that spread out over large distances to absorb nutrients from the soil." This description establishes that fynbos roots are specialized for efficient nutrient absorption. The experiment then confirms this function of the roots by showing that forest seedlings "isolated from the roots of fynbos plants exhibited a growth rate five times greater" than those near fynbos roots. This result demonstrates that when forest seedlings don't have to compete with the nutrient-absorbing fynbos roots, they grow much better. Choice B is incorrect. Although the text does indicate that the fynbos and the Afro-temperate forest are distinct from, and adjacent to, each other and that there is "almost no transition space" (area of mixed fynbos and forest plants), the experiment shows that forest plants can grow in soil occupied by fynbos roots, just not very well. So, the idea that the fynbos roots physically obstruct forest plants is unsupported by the text. Choice D is incorrect because it directly contradicts the text's claim that fynbos roots absorb nutrients from, and therefore deplete, the soil they're in, and furthermore, nothing in the text suggests that the habitat of the fynbos is harsh in general.

Question ID: 5eda42a3

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	Hard

Question

The following text is from Maggie Pogue Johnson's 1910 poem "Poet of Our Race." In this poem, the speaker is addressing Paul Laurence Dunbar, a Black author.

Thou, with stroke of mighty pen,
Hast told of joy and mirth,
And read the hearts and souls of men
As cradled from their birth.

The language of the flowers,
Thou hast read them all,
And e'en the little brook
Responded to thy call.

Which choice best states the main purpose of the text?

Answer

A. To praise a certain writer for being especially perceptive regarding people and nature

B. To establish that a certain writer has read extensively about a variety of topics

C. To call attention to a certain writer's careful and elaborately detailed writing process

D. To recount fond memories of an afternoon spent in nature with a certain writer

Correct Answer: A

Rationale

Choice A is the best answer because it most accurately states the main purpose of the text. In the first part of the text, the speaker addresses Paul Laurence Dunbar's ability to understand people (he has "read the hearts and souls of men" and written of their "joy and mirth"). In the second part of the text, the speaker describes Dunbar's thorough understanding of the natural world (he has read "the language of the flowers" and engaged with "the little brook"). Thus, the text mainly praises Dunbar for being especially perceptive about people and nature.

Choice B is incorrect because the speaker describes Dunbar as having read the "hearts and souls of men" and the "language of flowers" to convey Dunbar's ability to comprehend people and nature, not to suggest that Dunbar has literally read any of these things or has read a great deal about them. Choice C is incorrect because the text notes how well Dunbar has made sense of the topics he's written about but doesn't address any specific parts of Dunbar's writing process beyond the suggestion that he used a pen. Choice D is incorrect because the text focuses on Dunbar's understanding of people and nature as expressed in his writing. Nothing in the text suggests that the speaker is recalling a particular afternoon actually spent in nature with Dunbar; even if there had been a shared experience, the text isn't focused on reminiscing.

Question ID: d2e0cba5

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	Hard

Question

In a study of new technology adoption, Davit Marikyan et al. examined negative disconfirmation (which occurs when experiences fall short of one's expectations) to determine whether it could lead to positive outcomes for users. The team focused on established users of "smart home" technology, which presents inherent utilization challenges but tends to attract users with high expectations, often leading to feelings of dissonance. The researchers found that many users employed cognitive mechanisms to mitigate those feelings, ultimately reversing their initial sense of disappointment.

Which choice best states the main idea of the text?

Answer

A. Research suggests that most users of smart home technology will not achieve a feeling of satisfaction given the utilization challenges of such technology.

B. Although most smart home technology is aimed at meeting or exceeding users' high expectations, those expectations in general remain poorly understood.

C. Research suggests that users with high expectations for a new technology can feel content with that technology even after experiencing negative disconfirmation.

D. Although negative disconfirmation has often been studied, little is known about the cognitive mechanisms shaping users' reactions to it in the context of new technology adoption.

Correct Answer: C

Rationale

Choice C is the best answer. The passage begins by describing the study, and concludes with its results: "many users employed cognitive mechanisms to mitigate those feelings [of negative disconfirmation]."

Choice A is incorrect. This is the opposite of what the text claims. Rather, the researchers found that "many users" reversed "their initial sense of disappointment." Choice B is incorrect. This choice doesn't reflect the text. What the expectations of smart home tech users are is not discussed. Choice D is incorrect. This choice doesn't reflect the text. How often these topics have been studied is not mentioned.

Question

Optical tweezers are specialized scientific tools—particularly useful in biology and medicine—that use high-powered beams of light to trap and manipulate minuscule particles for study. Use of the tool has led to several scientific and medical breakthroughs over the last few decades, but the particles are often under prolonged exposure to the intense heat of the light beams. To overcome the risk of overheating, and thereby damage, researchers sometimes attach nano-sized glass beads to particles, allowing the light to focus on the beads instead of the particles.

Based on the text, what is one advantage of attaching glass beads to particles when using optical tweezers?

Answer

A. It decreases the time it takes for the optical tweezers to locate and capture the particles.

B. It facilitates the maneuvering of particles without directly heating the particles themselves.

C. It allows researchers to use weaker light beams to manipulate particles.

D. It adds a material to which particles can transfer any heat absorbed from the optical tweezers' light beam.

Correct Answer: B

Rationale

Choice B is the best answer. The text says that the glass beads get the "focus" of the light beams so that the particles don't overheat. From this, we can infer that the beads allow the particles to be manipulated without being directly heated by the light beams.

Choice A is incorrect. The text never says that attaching the glass beads saves time in any way. Choice C is incorrect. The text never says that attaching the glass beads allows researchers to use weaker light beams. Choice D is incorrect. The text doesn't say that the particles can transfer heat to the glass beads—rather, it says the heat from the light focuses on the glass beads instead of the particles.

Question

The following text is Vita Sackville-West's circa 1920 poem "Evening." Spars are ships' masts, moorings are ropes that hold docked ships in place, and a riding-light is a light that a ship shines when it is anchored.

When little lights in little ports come out,

Quivering down through water with the stars,

And all the fishing fleet of slender spars

Range at their moorings, veer with tide about;

When race of wind is stilled and sails are furled,

And underneath our single riding-light

The curve of black-ribbed deck gleams palely white,

And slumbrous waters pool a slumbrous world;

—Then, and then only, have I thought how sweet

Old age might sink upon a windy youth,

Quiet beneath the riding-light of truth,

Weathered through storms, and gracious in retreat.

Which choice best states the main idea of the text?

Answer

A. The tranquility of a port in the evening can incline a person to appreciate the stillness of old age.

B. The difficulty of bringing a ship into port is apt training for dealing with the types of struggles encountered in old age.

C. A person who leads a long life that is varied and active may find it difficult to stay in a calm place.

D. The contrast between the peacefulness of a port at night and its activity during the day reflects the contrast between the calm of old age and the vibrancy of youth.

Correct Answer: A

Rationale

Choice A is the best answer because it best states the main idea of the text. The speaker describes an evening scene observed from a boat: "little lights in little ports come out" and are reflected in the water's surface "with the stars," fishing boats are moored, "sails are furled" (rolled up), and the riding-light is shining. The speaker emphasizes the calmness of the scene, noting that the "race of wind is stilled" and the atmosphere is sleepy ("slumbrous waters pool a slumbrous world"), and then indicates that the calmness prompts thoughts of how old age might be "sweet" and "quiet" and "gracious in retreat" after "a windy youth" with "storms." Thus, the main idea is that the tranquility of a port in the evening can lead a person to appreciate the potential stillness of old age.

Choice B is incorrect because the speaker isn't discussing the difficulty of bringing a ship into port but describing the calmness of the port at night. And rather than suggesting that old age involves struggles, the speaker suggests that after "a windy youth" with "storms" to be weathered, old age will be "sweet," "quiet," and "gracious"—that is, old age will be tranquil like a port at night. Choice C is incorrect because the speaker isn't suggesting that a person who has lived a varied and active life might find it difficult to stay in a calm place in old age. On the contrary, the speaker suggests that after a "windy youth" with "storms," old age can be welcomed as something "sweet," "quiet," and "gracious," just like a calm port at night. Choice D is incorrect. Although the speaker does touch on the idea of a "windy youth" followed by "sweet old age," the speaker doesn't tie that idea to a contrast between daytime activity and nighttime peacefulness at a port. The speaker doesn't address any activity during the day at a port, only briefly mentioning that the "race of wind is stilled" at the end of the day, and instead focuses on the tranquility of the port at night and how it prompts thoughts of "quiet" and "gracious" old age.
