Question

Archeological excavation of Market Street Chinatown, a nineteenth-century Chinese American community in San Jose, California, provided the first evidence that Asian food products were imported to the United States in the 1800s: bones from a freshwater fish species native to Southeast Asia. *Jinshanzhuang*—Hong Kong–based import/export firms—likely coordinated the fish's transport from Chinese-operated fisheries in Vietnam and Malaysia to North American markets. This route reveals the (often overlooked) multinational dimensions of the trade networks linking Chinese diaspora communities.

Question

Using NASA's powerful James Webb Space Telescope (JWST), Mercedes López-Morales and colleagues measured the wavelengths of light traveling through the atmosphere of WASP-39b, an exoplanet, or planet outside our solar system. Different molecules absorb different wavelengths of light, and the wavelength measurements showed the presence of carbon dioxide (CO_2) in WASP-39b's atmosphere. This finding not only offers the first decisive evidence of CO_2 in the atmosphere of an exoplanet but also illustrates the potential for future scientific breakthroughs held by the JWST.

B. It describes how researchers made a scientific discovery, then explains the importance of that discovery.

C. It outlines the steps taken in a scientific study, then presents a hypothesis based on that study.

D. It examines how a group of scientists reached a conclusion, then shows how other scientists have challenged that conclusion.

Question

Why do sand cats purr but lions roar? Researchers hypothesize that this difference between the two feline species may be partly due to a U-shaped bone in their throats called the hyoid. Sand cats, which are much smaller than lions, have a rigid hyoid that rumbles when the cat's larynx vibrates, resulting in a purr. By contrast, lions have a somewhat flexible hyoid, and the bone is attached to the skull with a stretchy ligament that sand cats lack. These traits allow lions and most other species of big cats to produce powerful roars. The same traits may also prevent most big cats from purring.

Which choice best describes the overall structure of the text?

Answer

A. The text presents a theory about two species, then discusses facts that weaken it.

B. The text compares the habitats of two species, then explains how those habitats are changing.

C. The text describes a behavior shared by two species, then discusses other behaviors shared by them.

D. The text poses a question about two species, then presents a possible answer.

Under his hat, worn with a slight backward tilt, his hair had been carefully brushed into respectful sleekness; for his business was with an Embassy. Half a century since its inception, it continues to foster emerging Nuyorican talent.

Question

The following text is adapted from Etsu Inagaki Sugimoto's 1925 memoir *A Daughter of the Samurai*. As a young woman, Sugimoto moved from feudal Japan to the United States.

> The standards of my own and my adopted country differed so widely in some ways, and my love for both lands was so sincere, that sometimes I had an odd feeling of standing upon a cloud in space, and gazing with measuring eyes upon two separate worlds. Question ID: f631132b

Question

In the *Here and Now Storybook* (1921), educator Lucy Sprague Mitchell advanced the then controversial idea that books for very young children should imitate how they use language, since toddlers, who cannot yet grasp narrative or abstract ideas, seek reassurance in verbal repetition and naming. The most enduring example of this idea is Margaret Wise Brown's 1947 picture book *Goodnight Moon*, in which a young rabbit names the objects in his room as he drifts off to sleep. Scholars note that the book's emphasis on repetition, rhythm, and nonsense rhyme speaks directly to Mitchell's influence.

Which choice best describes the overall structure of the text?

Answer

A. The text outlines a debate between two authors of children's literature and then traces how that debate shaped theories on early childhood education.

B. The text summarizes an argument about how children's literature should be evaluated and then discusses a contrasting view on that subject.

C. The text lists the literary characteristics that are common to many classics of children's literature and then indicates the narrative subjects that are most appropriate for young children.

D. The text presents a philosophy about what material is most suitable for children's literature and then describes a book influenced by that philosophy.

Question

Works of moral philosophy, such as Plato's *Republic* or Aristotle's *Nicomachean Ethics*, are partly concerned with how to live a morally good life. But philosopher Jonathan Barnes argues that works that present a method of living such a life without also supplying a motive are inherently useful only to those already wishing to be morally good—those with no desire for moral goodness will not choose to follow their rules. However, some works of moral philosophy attempt to describe what constitutes a morally good life while also proposing reasons for living one.

Which choice best describes the overall structure of the text?

Answer

A. It provides a characterization about a field of thought by noting two works in it and then details a way in which some works in that field are more comprehensive than others.

C. It summarizes the history of a field of thought by discussing two works and then proposes a topic of further research for specialists in that field.

D. It describes two influential works and then explains why one is more widely read than the other.

Question

The following text is from Herman Melville's 1854 novel *The Lightning-rod Man*.

The stranger still stood in the exact middle of the cottage, where he had first planted himself. His singularity impelled a closer scrutiny. A lean, gloomy figure. Hair dark and lank, mattedly streaked over his brow. His sunken pitfalls of eyes were ringed by indigo halos, and played with an innocuous sort of lightning: the gleam without the bolt. The whole man was dripping. He stood in a puddle on the bare oak floor: his strange walking-stick vertically resting at his side.

Question ID: e7247766

Question

Horizontal gene transfer occurs when an organism of one species acquires genetic material from an organism of another species through nonreproductive means. The genetic material can then be transferred “vertically” in the second species—that is, through reproductive inheritance. Scientist Atma Ivancevic and her team have hypothesized infection by invertebrate parasites as a mechanism of horizontal gene transfer between vertebrate species: while feeding, a parasite could acquire a gene from one host, then relocate to a host from a different vertebrate species and transfer the gene to it in turn.

Which choice best describes the function of the underlined portion in the text as a whole?

Answer

A. It explains why parasites are less susceptible to horizontal gene transfer than their hosts are.

B. It clarifies why some genes are more likely to be transferred horizontally than others are.

C. It contrasts how horizontal gene transfer occurs among vertebrates with how it occurs among invertebrates.

D. It describes a means by which horizontal gene transfer might occur among vertebrates.

Question

Part of the Atacama Desert in Peru has surprisingly rich plant life despite receiving almost no rainfall. Moisture from winter fog sustains plants once they're growing, but the soil's tough crust makes it hard for seeds to germinate in the first place. Local birds that dig nests in the ground seem to be of help: they churn the soil, exposing buried seeds to moisture and nutrients. Indeed, in 2016 Cristina Rengifo Faiffer found that mounds of soil dug up by birds were far more fertile and supported more seedlings than soil in undisturbed areas.

Which choice best describes the function of the underlined portion in the text as a whole?

Answer

A. It elaborates on the idea that the top layer of Atacama Desert soil forms a tough crust.

B. It describes the process by which seeds are deposited into Atacama Desert soil.

C. It identifies the reason particular bird species dig nests in Atacama Desert soil.

D. It explains how certain birds promote seed germination in Atacama Desert soil.

Question

Michelene Pesantubbee, a historian and citizen of the Choctaw Nation, has identified a dilemma inherent to research on the status of women in her tribe during the 1600s and 1700s: the primary sources from that era, travel narratives and other accounts by male European colonizers, underestimate the degree of power conferred on Choctaw women by their traditional roles in political, civic, and ceremonial life. Pesantubbee argues that the Choctaw oral tradition and findings from archaeological sites in the tribe's homeland supplement the written record by providing crucial insights into those roles.

Which choice best describes the overall structure of the text?

Answer

A. It details the shortcomings of certain historical sources, then argues that research should avoid those sources altogether.

B. It describes a problem that arises in research on a particular topic, then sketches a historian's approach to addressing that problem.

C. It lists the advantages of a particular research method, then acknowledges a historian's criticism of that method.

D. It characterizes a particular topic as especially challenging to research, then suggests a related topic for historians to pursue instead.

Question ID: f6352bd3

Question

Many archaeologists assume that large-scale engineering projects in ancient societies required an elite class to plan and direct the necessary labor. However, recent discoveries, such as the excavation of an ancient canal near the Gulf Coast of Alabama, have complicated this picture. Using radiocarbon dating, a team of researchers concluded that the 1.39-kilometer-long canal was most likely constructed between 576 and 650 CE by an Indigenous society that was relatively free of social classes.

Which choice best describes the overall structure of the text?

Answer

A. It describes a common view among archaeologists, then discusses a recent finding that challenges that view.

B. It outlines a method used in some archaeological fieldwork, then explains why an alternative method is superior to it.

C. It presents contradictory conclusions drawn by archaeologists, then evaluates a study that has apparently resolved that contradiction.

D. It identifies a gap in scientific research, then presents a strategy used by some archaeologists to remedy that gap.

Question

The following text is adapted from George Eliot's 1857 short story "The Sad Fortunes of the Rev. Amos Barton." Mr. Ely is a clergyman in the town of Milby.

> By the laity of Milby and its neighbourhood [Mr. Ely] was regarded as a man of quite remarkable powers and learning, who must make a considerable sensation in London pulpits and drawing-rooms on his occasional visit to the metropolis; and by his brother clergy he was regarded as a discreet and agreeable fellow. Mr. Ely never got into a warm discussion; he suggested what might be thought, but rarely said what he thought himself; he never let either men or women see that he was laughing at them, and he never gave any one an opportunity of laughing at *him*.

Which choice best describes the overall structure of the text?

Answer

A. It shows that Mr. Ely had originally been held in high regard by his friends and then details the events that caused their regard for him to subside.

B. It implies that Mr. Ely's neighbors are more naïve in their estimation of him than people in London are and then explains why his neighbors have been so easily misled.

C. It stresses the discrepancy between Mr. Ely's public and private conduct and then alludes to his motivation for hiding his true personality.

D. It presents the favorable opinion of Mr. Ely that other people hold and then describes the behaviors of Mr. Ely that enable him to maintain that favorable opinion.
